May 7, 2025

[Muziek: Austria | Band of Brothers – Soundtrack
<https://www.youtube.com/watch?v=L0btMZ03K9A>]

Well welcome, and hereby my personal greeting to you today that you are here. I didn't stand at the door, this is the moment of the welcome, nice that you are here now, this moment that is so incredibly valuable, because you are there. Because you have decided to live your own way. Just like me.

Because sometimes you are forced or forced by what you have ended up in, to turn a quarter turn in yourself and to turn inwards.

You dare to ask questions of what am I actually doing?

And, I know very well what I am doing.

Everything is there in this world.

We can be grateful that on such a day as today we are aware of our consciousness, I am aware, you too, all of us, that life, the life that can be lived and the life that is now being lived, that it carries unmeasurable possibilities.

It is a huge event in which we are all present here. And we don't have to be the same, we don't have to be like someone else is.

No one has to be like me and I don't have to be like you.

That also means and keeps and also maintains that we can and may enjoy each other. Precisely because of the uniqueness, precisely because someone else is different, precisely because someone else knows a different way inward. And also from that way inside out again. It is a moment to reflect on. Again. Because life is precious and life is infinite.

And in the world we live in now, and you may recognize this, standing still every now and then in your own daily journey is a gift.

A moment in which space, which is already there, expands. In which there is and can be more and more complete space if you give it the space to expand. To feel what this world is. Yes and the moment of reflection, the moment of standing still is also something that we all really need as people in this world.

Many people don't think about that.

And maybe you recognize that too, that you have known moments in your life and maybe also now, in which you notice, hey I am or, or was I, not thinking about that at all. That you can step on the brakes every now and then, and come to a standstill in all the thoughts that are there, in all the reasons that have been invented, to be free from that. Loose and completely free, in that moment.

Yes, it is really a decision from within, for every person, to also meet other people. A real meeting is not just anything. I have often been inquisitively surprised in this world.

But not surprised either, because I also know that this is how it goes here. People introduce each other, themselves to each other. A hand or... And it is said who one is and the other tells who the other is. And in fact, nothing has actually happened. What is really getting in touch with each other? Where does that moment start?

In business too. When is a customer a human being? And when are you as a company the human being? Everything is put down in forms here in this world. And we as humanity have come to believe in that.

We as humans now understand that we are not. We feel that.

But it doesn't mean that if you understand that F[with your heart and that you feel it, that you will never know those mechanics and mechanisms again. And that you still sometimes imagine yourself as that one person who is a customer here or a company or a mother or a father. And we are so much more. Or that you have now said goodbye to all those models. And that you are going to introduce yourself from the new model, which is much freer.

Yes, that's how we are gathered today to have a possible exchange, a deliberation. And as far as I'm concerned, that's a beautiful day that we're putting here now, because you're there. The things you walk through, the recognitions, the light frequency of your own consciousness, the feeling free heart, also your own free feeling thinking.

I think that when I say that it connects us all so much, and that connection I still have in my consciousness that is still completely just in my awareness that all of us, every person who is here, everyone, and all over the world that applies of course, and beyond the edges of the visible, that we become aware that life is freedom and can therefore also be if it is chosen.

And that we dare to step through to the deepest layers of ourselves and feel where that freedom is still held back by a thought, by a behavior, by a program somewhere, by something that still has to be achieved, "something still has to be achieved."

The one thing that still needs to be achieved". That too can leave.
That connects us, because we all do exactly the same thing.
I think it's a very big encounter here on earth.
And in one moment the conversation and the meeting go a little smoother than at the other. Of course, you also recognize that in your own way.

But I think it's a very beautiful experience to realize that we are all doing the same thing, just in a slightly different way.

But where are we headed? I'm sure I'll run into you there.
And it doesn't matter at all if I take a detour for the other person or if I see that someone else takes a detour in relation to me. Because I have faith and know we all meet in the same place.

For there is a greater destiny behind this which we are all experiencing.

We now have in our own daily layers of existence we all have through home, through the things we call home, home, children, grandchildren if there are any, family, friends, relationship, relationships, ex-relationships, whatever you want to call it, we have also all discovered destinations in it. So the destination may be that you have to go to freedom when you are in a committed relationship. Then the destination can be that you dismantle that, that you come into freedom, into rest, into peace, into acceptance with all life that can be experienced in a different way, then that can be a destination, but there are even greater destinations around it. So loose and open, letting go of things with your consciousness, and letting them open, because you don't want any of it, no interference, no interaction, but open.

That great destination connects us, because that is where we all come together, every person carries that within him, you don't have to learn that, no one has to learn that, there is nothing to learn here, here you actually only unlearn things.

The moment we may realize that, that is now, that we all carry a great destiny within us and that it has a common moment of what is going on behind the system. That is the connection that exists between us.

And I mention it that way here deliberately, because in such a time in which we all live now, we all have to keep the balls up energetically, in the air.

And that also just means that you don't throw balls, you just lie on your mattress, or in your hammock. But in such a time as we live in now, a lot is asked, actually by ourselves, because we have chosen that path. We have seen it, not an outward message, but we have seen ourselves again.

And there, that moment when you have seen yourself again, and the journey through it inwards and the meeting with each other, is very hard tested in such a time in which we now live.

And that word heavy can make it heavy. However, it is not put down by me as the word heavy in the energy.

The contact between us as colleagues.

The wisdom and love that is in our hearts. It is really necessary, also this day, to be and stay in touch with each other.

If something happens in this world, outside of ourselves, you can still say, it's there. When teams arise on earth, who vibrate together from the heart power, love and freedom and really with each other. When those people come together and they also talk to each other about bigger, bigger, let's say, destinations, cosmic destinations, then you will also see that in meetings 'systemic errors' in quotation marks also become visible.

So that there can be frictions, and that doesn't have to be like clashes, but it can also happen within yourself. And that's where it is mainly with most people. The step that can follow is that it becomes a clash, either with yourself or with others.

Let us be aware that the moment you are again a representative of the world of light and the free heart of the consciousness of the world without spiritual models and great powers around us.

Let us all be aware that as soon as we bundle together in that, that even though we do that, even on a certain field, in a certain frequency, we are still part of the system of this earth.

What is happening is a lot, and that is also why I am talking about those larger destinations with each other, what has happened a lot is that through systemic frequencies, through people of the heart, with the largest and deepest emotional reasons to get in touch with each other, that it is precisely there that those systemic disturbances will also become visible.

It is simply in the frequency how it functions and it is up to us and it is up to you and it is up to me to let that become visible, to let it be, to recognize it, to realize it. And in a way, it's just a word, but also an admiration for it to be visible. This is not what I am experiencing, but through me it is felt here. Through me it is thought and through me it may also be expressed and with action. That you can see in such a moment of this is what is happening here and it is allowed through me because it is me unbuttoned. That is also the discharge force that we are.

Don't be afraid of pain and sorrow and all that kind of thing, don't be afraid of frictions and contact disturbances, don't be afraid or don't take an attitude when you see each other and there is something between each other, but open yourself up.

Know that we are also dischargers.

We are the People of Ever, an organic intelligence and we all have and we all feel

that, you don't have to test that anywhere, you can see it directly in your own life. If there is tension or a disturbance somewhere, that disturbance will always be noticed by you and then it will also be discharged through you.

This is a tool of the highest power and we should also take a moment to reflect on it. It is also allowed to cry sometimes, emotions can also be felt. And if we just support each other in that and love each other and see that what the other is going through is also a release in a certain way and we don't interfere with our thinking, but we take care of that moment by supporting.

Then we are a whole step deeper within ourselves, also as a team in the moment of now.
Welcome.

These are such important pieces. Why?

Because we are in time, as I just mentioned, of larger destinations that are unfolding here. And through you and through me, it is not possible for greater destinations to unfold if I do not discharge myself.

If the pain that is there and also becomes visible through systems cannot be discharged in peace, that is important. I think everyone can recognize it in a certain way.

You also see I have done a lot of research in the past 30 years just by working together with other people, I didn't call that a study at the time because it actually seems like a kind of preconceived thing and it never was, it's just purely my experience, but I have, looking back I can now call it research, I have seen that and that is also the reason why I also come here with you to create a day like today, I have seen that all collaborations between people have all stumbled in the end because this last piece, the realization that we are dischargers, that we also discharge each other's pain by being there for each other, that it could not be appropriated.

It was constantly applied to another or another system via object reference. Collaborations fell apart, a lot of preliminary work that has been done fell apart and of course nothing is ever lost because everyone takes that part of what has happened into their own frequency field and their own process.
So something is never really gone.
But this is extremely important.

[00:20:15 minutes]

That's how I'm tuning myself, I'm actually quite tired physically but fortunately that doesn't show. I'm just swollen from it, but that's not bad at all, I've been working for several months to put all things in order. To do what I came for. To actually use it.

That is also a timing.
I'm here just like you.

I can do what I do completely. And so do I.
But I'm not here to do what I do alone.
I am here with you.

I am here in the realization that every day of all of us in this reality starts in much the same way. And that we all come up with something beautiful with our consciousness and also the challenges that come with it.

So I'm busy too and well yesterday I was still carrying tiles of 30 kilos each. That was day 3. Day 1 I thought well this will be half a day of tiling but it turned out to be three days. But it's been like this for a long time and I'm very happy because I notice that through those physical efforts..., the country becomes very beautiful.

I hope that after Friday or Saturday we can switch from [name of province] to [name of province]. But why is it all taking so long?
Actually by the animals.

Because we have a lot of animals. In our area we have rabbits, there are chickens, there are goats, cats and cats. And they all have a well-deserved place in the country, or anywhere else. And so we have to rebuild all that.

So actually, our move is just about 90% of time, on these beautiful things. And yesterday [name], my biological son, was paving those tiles. And he has put it in perfectly. Unbelievably beautiful.

I say, gosh dude, you did that incredibly beautifully. It looks beautiful. "Yes, straw will go over it later". Yes, I said, I know. I said, why don't you throw away that ruler to make it exactly flat, but just put it in a little more like that, although it will be two millimeters higher from that side. After all, you say yourself that there is still straw over it. Yes, he said, "but I know that. I know, because I put it". Literally with his hands over all those tile seams in such a way that it lies exactly flat. Level, that the puddles get exactly there and can leave. Precise!

He says "I know that. **And the goats also need a attention floor**".

Yes, so I am also engaged in all kinds of attunements around the great deliberation where you have arrived together and all, let me say, baggage, positive spiritual baggage that we carry within us, that we have opened up and can be felt again to bring that together.

Well and there has been a hole in the road in [record name] for a while, a fairly large hole and I had already said a few times gosh how strange that that hole is in that road that it just stays there. What do you mean said [name]. I said that there is actually no one at all who in this world, systemically here, so think, that there is no one who just calls the municipality once in a while and says there is a hole in the road. Yes, she says that's actually quite crazy. So I drove my wheel through that hole and then my air suspension was broken again.

But I came from the other side and suddenly a tractor stopped.

So I drive through that hole from the other side with sunlight against my eye.

And so I don't see that gap at that moment. I'm doing something else.

And I go right through that hole with my wheel and from the other side it was really an obstacle of I have you there. So bam it was. Piece. Wow...

I say yes. I think I'm the one who is going to report that gap.

This is all consciousness work, isn't it?
Because that's all you think and all you feel.
They are all layers.
It is our strength that we are.

So I called the municipality, yes they say do you have something to report?
I said yes that about that hole. Then you can do so via the website. I say oh.
Well I rode there the day before yesterday and the gap was closed, I hadn't reported anything.

I said, god would be nice if I came to live there again that there would be all kinds of corn around the house again. Yesterday corn was sown over it again. I say, gosh how fast the cars always drive here.

Yesterday it was announced that there will be a speed limit.

I went to the hairdresser, a little too short, I'm going to sit there the man says "I haven't seen your time". I say that's not right to you either. Were you gone?

I say yes I was away for a while, just in [place name].

Oh yes yes that's actually very close.

I was... Yes, I'm from Iran, he says. He is about my age.

I say how beautiful. Yes. Did you also tell something about it last time?

Yes, well, people often think I'm Turkish, but I'm from Iran.

I say, but I never thought you were a Turk, because I can see in your eyes that you are from Iran. Yes, you can see, huh! I say yes, I can see that.

Where are you from then?

I say, yes you are from the vicinity of Tehran. Ohohh.

I couldn't see it in his eyes, but that... And we still had a nice conversation there.

And I just said yes over coffee... It was actually an exchange session so I swapped my hair for everything that happened there.

And he told so many things, he says yes I was also uhm... and the hair was getting shorter and shorter [laughter].., do you want to shave?

I say no no... Well you see what happened [laughter].

Anyway, I was in a conversation and he told me how he came here in the Netherlands at a time when there were no computers and no telephones at all. He says, dude, we did, me and my wife really did our best.

We came from a different world.

He told what that world looks like. I sat there, I sat there. I wasn't in Hoogeveen, because that's where the hairdresser is. I sat with him.

In those, in the old part of the city, in Tehran.

And so he told how he got here. And that he has worked so hard to be here. That he had to learn it all himself and that six months later he could speak Dutch. And what kind of opposition he has had and assumptions. Now he still has how to keep his garden clean.

Because he said, if my garden is a little dirtier than the neighbor's.

Then I immediately get thoughts about that, from those foreigners who...

Well, I now have two daughters, he says. And yes, that was on Liberation Day I hung up the flag, and on Remembrance Day too.

And my daughter said dad, what are you doing? Why do you hang up the flag?

You weren't at the Second World War, were you?

Yes, he says, but that doesn't matter, does it? Yes, of course it is.

You don't know at all, do you? He said, but I do that out of respect. Because I'm here. And the moment I'm here, I hang out the flag because I feel that it is meaningful to a lot of people and I also feel so welcome in this country and that's why I picked up that flag. That's just so heartfelt.

At one point he said, I also attended the funeral of the Pope. Well, my hair was short enough [laughter].

It was very beautiful, he didn't go there specially.

But I happened to be in Rome for a week, five days. And then that happened and then I could still go there. So he said, it's so special to feel how all people are different. If I may say one thing about what I have learned in this world by coming from Tehran and having to build everything myself. Yes, he says that is actually, if I had been born in Israel, yes, then I would probably be of the Jewish faith. If I had been born in the Netherlands I would have been a Christian, or maybe a Catholic. If I was born..., well that's how he mentioned a number of examples, he actually says it doesn't matter at all, what you believe in, the form. It's about believing in yourself, in who you are, in how you treat each other.

And then he really stopped cutting.

We were just looking at each other through the mirror image.

It was a moment just of nothing.

It was just a direct connection through the mirror to his message, his frequency from which he speaks. So beautiful. Yes, very special.

Well then I came home and then the roof was almost finished.

Because I had said two weeks ago what does the roof of the electricity house actually look crazy. And yes, I was refreshing everything and nature. That electricity house from Enexis, that should actually, yes, actually that roof should come off and a new roof. So well, that roof was almost finished. I hadn't called.

And two days ago I said, a day before I got a haircut, I said that at home.

It would actually be nice if that electricity house just went away, wouldn't it?

Because there is almost nothing in it. That thing can also just go.

And then just a station down there.

So I say to that guy from the real estate improvement company, that's what's called [laughter], well I said and did the improvement work? Yes yes, the improvement has succeeded.

I said that's crazy too, isn't it, in six months that thing will no longer be here.

What do you say? I said in six months it won't be here anymore, they are going to take it away. Well I don't think so.

I said what authority have I given you to think in my garden what will be here.

Then he says, so hey what do you do for your work? That was a lot of fun.

[laughter]. So I explained, quantum physics, reactions. And then he understood it perfectly, perfectly. Yes, well, well, he says, I won't interfere further. Then he was called by that boy on top. Then he says the mortar is gone. A concrete layer had to be put on top. I say, you see. [laughter]. Yes, then it went.

[00:32:00 minutes]

That greater cosmic destiny is not a coincidence.

We are in the process of bringing our lives back into this reality.

Not to live from here, from the system, but we are all busy in our own way, and it is nice if we can really receive each other in that, we are busy with our own, real

life, real life, not this which is full of rules, rules and everything here.
Because real life who you are, who you really are, to bring that here. Hither. That's our mission, that's your mission, that's my mission.
Doesn't mean we all have to do it the same way.
But we bring it here and it has come here.
That's why we're here today. To see what else we can unpack in terms of possible insights and powers of awareness.
What is my life doing right now? How does that work?
But above all, and that is my part why I am also here, is to take a good look at each other again. And I say it out loud, nothing in me wants to make information available with the aim of being copied.
In fact, if my information is copied, copied, pulled out one on one, then it is untenable because it only belongs to me in this constellation. So then it will perish, then it will disappear and then it will not come back, then you will have to copy again.

What is important and valuable is that you listen to each other and feel inside what that means to you, so that your own inner memory comes to life from within, with feelings, with your own insights, with your own landscapes, with your own recognitions, let me say also with your own images and feelings, from within yourself.

And for me it is very valuable that I say a few things about that so that in everything that we are going to experience here on earth in the coming times, that we can be aware of what the booby traps are, what the pitfalls are, what the deceptions are.

I mention strong words because all kinds of things, everything is being pulled out of the closet to get the closer the people get to the Land of Ever, the more organic and completely organic your own consciousness is to bring a deflection into it in a certain way and still bring back a certain form of spirituality.

I think that is a very important point. Over the past many years, just like you, I have looked around and talked to people everywhere on earth. All beautiful people and it was all quite difficult to get in touch with people who are members of a club, so to speak.
If it's difficult for other people to connect with you, you should explore this as well. Or that it might be because you are a member of a club.
Then it has to come out. Blot. Just has to happen.
You just have to act very clearly against yourself.
Feeling good, looking, experiencing. Then detach yourself. Apart from everything. Apart from me too. You have to continue to feel your own completely free playing field.

For me, my approach is always to meet each other and to be able to talk about all possible things and to be able to feel through all possible layers to all go home fruity and fresh and powerful from yourself, from your own frequency, so to speak.

So that you can talk about big topics that can also have certain effects in certain cases. That you feel like; hhoo... What is this?

But that you can carry it in your own frequency and continue traveling in your own frequency.

And that you have not become that information.

Why I say all this is because, and otherwise those deliberations, which is just a word, but has a very big deep meaning, can be spiritually adjusted. Yes. And that happens. We all know that.

The special thing is that it is often only seen in the other person.
Well. [some silence]. Yes. Know what you think.

We are in a very important time.

Know what you think.

We are present in a very important period.

Don't get distracted.

Don't be fooled.

Every time you think of things that are not yours.

Not having to deal with your own consciousness.

With your own path.

Clean it up. Stopper. Stopper.

No more headaches about what the other people say.

When I say things and it keeps you busy, busy, busy, busy.

Then know that what you are doing, I never said. Realize it. Clean. Free your own beautiful heart.

So I've been through all those many beautiful years and meetings with people. Not only here in the Netherlands, but also abroad. And still is.

And I've seen how difficult it is.

For many people in this field of information..., been.

That there is a greater reality.

Which is so incredibly staggering for the people.

Because that's a shock.

Because if that is true, that the whole meaning of life both of yourself and in the world in which you live is completely lost.

I have seen how difficult it is for the people who believe, believe, believe in frequencies because they feel vibrations at those frequencies, at those stories, vibrations that are pleasant. So if I'm, I'm going back to 2003.

In 2003 I worked with a number of people here in the Netherlands and abroad, people who were working on, and everything I say is spoken in love.

I have just as much appreciation for all those people as for people who vibrate with information and inner knowledge from Origin and not from a scripted story. That all

sounds very judgmental what I am saying now, but I can't say it any shorter, longer than this.

Those people were busy with information from the Galactic Federation, so the Galactic Federation of Light. How difficult it was to tell, to tell something, not about the Galactic Federation, because when people talk directly about a subject that people are very concerned with, when those topics are spoken about directly and messages, stories, information is also given about it, for example by me or the others, directly about that information on which people have based their entire system, So reading channelings, reading books.

Their entire reality of this third dimension is geared to the arrival of great Galactic Confederations with messages for humanity.

If this is discussed directly, it underlies an energetic forced dismantling. And that goes straight in, right against the freedom of every person around me. So I can't just do that, I can, but that's something I don't do. I do that in a different way and then I still mention it.

But I have noticed how difficult that is to talk about that. How difficult it is to talk about God.

And yesterday when I was sitting on that chair with that man, we looked at each other in the moment and then he says, we are God. And I feel it again now, at halftime. That man also cuts very..., it was just meditation with his hands over my head. I felt it here on my chest I felt it move. Just because he said so. He said, he, he this beautiful man, who said that, so o-p-e-n. And so tuned.

In that moment of when there was nothing at all, that peace, and he says that. I went to churches, to cathedrals, monasteries and it was not possible to talk about them. It is a subject that must of course be very well substantiated, energetically.

And I just want to exchange a few things with you today.

It is a day of deliberation in which we all, and that can also be done with awareness within ourselves, in yourself. It can be done in any way you choose. The only one who is in charge of that is you. But you can also, like me, speak essentially. A deliberation that we are having together here today. Where you feel like; this needs to be put on the table.

[00:42:53 minutes]

I'm not from here.
And actually, I wasn't born here either.

And I am here in this world, just like you, to see things. Not sensory with my eyes, but punching holes with my frequency of feelings. And I do that from my understanding of this world, in myself, that we can be in a world where things function differently.

I understand that choices are made that are very different from who I am. I understand and I understand when someone in my family or in my circle of friends that I don't have, says something to me or makes a decision that has no connection at all with the deeper intelligence, the deeper power when you really start feeling.

So in this world, you can actually only do the work from home purely by understanding. And you need that every time.

Again and again you will have understanding, and insight, feeling, no words, no thoughts. Loose. This is what is happening now. This is what is. Need you in this world.

Because otherwise you will be pulled into it.

And these forces are so smart, because they play out directly on your screen in the form of this reality. Penetrated into a gigantic other experiment.

Brought together the fall of humanity in an experiment.

Played out directly on your screen.

So understand the major disruption. That's what it's called here.

This is a section with a very large disturbance.

So smart, that you wouldn't even be able to see it if you didn't know anything about it because then you think, yes, but that's not a disturbance, that's just..., people still have something to learn.

It's just a learning process.

It's not.

Well, I am also present here in this world.

I come from a world in which there is no spirituality at all.

Not at all. Zero. Only love, purity, honesty, strength, a physical body, a beautiful reality.

The opposite of what you feel in this world, when you are in this world, just when you are sitting here now, as we are sitting here now, is actually that the sock is inside out. You can feel your body, you can be aware, you are aware of yourself. You also feel the connection with the world, that every person is involved in creation.

Even though it is a matrix, but actually we feel almost nothing here in relation to where we come from, where I come from. And with that piece of almost, almost nothing, that piece that is there, we are still aware that we are much more than just this. And when that sock goes inside out, then you feel, then this world is instead of a densely muted frequency of very often misunderstanding, irritation, disappointment, or that you actually want to run away, fatigue, you name it.

Then you feel the opposite. That is a world in which you feel each other.

You don't have to look at each other to see and receive each other.

It's so bright and so clean. You feel the Force, the Power of Life.

That is a vibrational field that is so clear and so clean.

Last year I was in the water in the mountains in the south of France. And it was such a deeply peaceful moment there. I was lying there in a rubber ring and I went on and on about the water and the peace, the genuineness, the purity and the complete absence of everything else, that's actually how we feel at home all the time. Scents are more powerful. Colors that exist that don't exist here. We can smell colors. We can feel colors. And you know, when you close your eyes, what vibration of colors you are in. That is a world where there is absolutely no spirituality. Nothing. Humanity is awake there. And is very strong there. Strong, loving, powerful people. Soft, powerful people. Very intelligent. Very warm, open. A mixture between a hyper-intelligence of what you see here on earth that lacks an emotion. Is there..., that's our emotion. We can feel everything from the feeling mind. We understand everything, we understand everything and we are. What you focus your attention on just comes to you, to life within yourself. Everything is free, everything is open. There is a joy of life, the sense of existence that is so warm and so..., gives energy, that., giving the food for example..., feeding, which is not necessary, because animals all eat by themselves, but you also give the animals that are there, you sometimes give something tasty, just like the other way around, that we also sometimes get something tasty from them that they bring. Giving, sharing, handing over something, it's all energy, giving something away, that's an explosion of energy and space, spiritually and emotionally. There are no gods, there are no systems. There is insight and understanding, call it knowledge, of where we are and of what we are connected to, what our tasks are that we have not been given by higher powers, but tasks that we all feel within ourselves. People are together who have a certain feeling about a certain task, about a certain vibration, those people come together and arise there for a certain period in which people feel they want to do that, large working groups, large multidimensional groups that also travel with each other with that love and that commitment to be able to function in that part. It is a world of great cosmic diplomacy.

There are great heart diplomats.
We do not shy away from danger, we are not afraid of anything.

We do realize that there are great dangers, elsewhere. We are aware of that. It is an infinite expanse of Life and fulfillment. Every person has a beautiful house, that is the house you are. The house you have to build here and have to search for and create or fail, those are all memories of home. It doesn't matter if you live in a caravan or in a very large bungalow with five floors. It's about what you build inside. That's where you make it. And those are, if you listen to your feelings, they are memories from home. People have a tremendous space and pleasure in their lives.

There is no death, so that word does not exist there either.

It cannot be thought of there either, just with words.
So it means that the word 'death' and the meaning of death is a language, a consciousness, from here. We just have to move into ourselves.

That's where you come from and I don't know where you come from but you know that too. But here in this world, where we are now, you have long since come across what your home should look like in terms of energy and possibilities. You can't miss that.

What you like to do here, where you flow through this, where you can feel relaxed through yourself here on earth, which is usually answered in this world as a slap on the ear and then you lose it again.

But that's where you live at home.

We have at home, from the Realms where we come from, so we have no spirituality at all, nothing at all, zero. Well that means in this case, that all the systems that we encounter here on earth, I speak purely from me and no one has to agree with me, that's why I don't say it all, I just say it to say it - to share.

It means that all systems here on earth, I'm going to get very black and white for a while. Consciously, consciously in love. Means all the systems that are here on Earth. Systems, models, information, potential smart programs, discs.

No matter how beautiful the groceries are.

That these can be potential opponents or distractors or catchers, consciousness catchers, in order not to concern yourself with what would it actually be going on in this world, if it is true, where it is now, what I am telling now, if it is true what I, you, feel inside, what would be the consequence of that?

What would be the consequence of that?

Why should I still have to learn?

Why should I comply with something?

[00:55:35 minutes]

Well, that's how I've talked to reincarnation therapists.

I said, you are a therapist, but you are not reincarnated. Sorry?

And I repeated that again.

So you have to look carefully when we are talking about such a deliberation, when we are going to talk about all kinds of big topics, and again it does not have to be with words but it can also take place within ourselves, if we bring that cosmic diplomatic level of ourselves out of our own consciousness and bring it up again.

Then you have to look for yourself, as a diplomatic - cosmic diplomat, you have to look for yourself in here to see if there are programs that we don't really don't matter anymore. You have to do that for yourself, not for me, you don't have to.

Although for me you have to do it too, otherwise I can't communicate with you further. Because we are in bigger destinations and it is not about me at all, I have no authority, I speak it out.

And you have the same right to speak out to me.

Because we are each other's equals. So you have to look at that carefully.

Or deliberations, or meetings, or meetings.

Or intense consultation about the things that are happening.

And who are needed now to take action together.

To put down together. And to open with each other.

To fill each other with awareness of whether that is really completely clean in yourself. Is it really possible to be completely present here on earth without anything from the outside, whatever that is?

What remains is pure your love.

Your intention that is underneath to work together with every person.

To work together with every creature. To cooperate with any civilization. To work together, also here on earth, in large, at the moment, complex matters. So I said, that building is going to go in six months.

And half an hour later I received a call from the American immigration service.

To become a U.S. citizen. Der in, huh.

It is not about American citizen.

That's not what it's about.

It's about..., you have to remove the shapes. Shapes away.

Look at frequencies. Look at frequencies.

Everything is vibration. Vibration. What is the vibration?

What shape can the vibration take?

An hour later I get a call from the embassy in Tel Aviv. [name] says, what's going on?

I say, yes, we have to cut a few tiles first.

Are you ready or not? Not for me, huh? Are you really ready, for yourself? Are you going all out? Are you really so far within yourself that you completely put down, from your feelings, who you really are?

Do you put yourself completely into it? Or not?

Two words.

Project Black Box Octopus en Project Starforce.

I would like to say more. I would like to communicate more about this with each other. But there are still some around us here and there, that's not who we are. But there are some things around us here and there that give us access to really be a field with each other.

An organic field.

To prevent that.

In recent years I have told a number of people not come anymore. All in all, there are two people who have not given me that authority.

And the people who did give me that authority, I don't see.

It's not about the people.

Are you wearing your suit with your big emblem of the place you come from?

That's what it's all about. I already know what I'm doing. You know it too.

Get up, tackle, clean and get in.

Well, so it's been noted what we're doing.

I've said that a few times before.

Only and only this; human power of consciousness.

So the autonomous power of you. Just this inner strength.

And that's a power, I just referenced it afterwards, it's clear, soft and very powerful. Only human consciousness is capable, not simulating, because they make you think otherwise.

Only human consciousness is able to eliminate the parasitic force that

moves in man. Only human strength can do that.

That's why I'm here. To remind us all that an incredible disaster has occurred. And that the disaster that has taken place should not be seen as a disaster by many people.

And again, also by the people I have met myself here and outside the Netherlands for many years, I see that at a certain point people still see the information we have gone through as a possibility, as a theory, because it is my information that is being listened to and it is not!

You have to look at what you hear with each other and what you feel in your own life, in your own existence. You have to see it.

You also have to do your own research. Hey.

Own research.

I myself have met a lot of people in this world who have gone through all possible currents. By all possible currents.

And eventually, and often you are now a little older than 60, just about, that's about it usually happens, you actually find out, what you always know about; But this has an end, this story.

Where am I in this piece?

Where am I?

Where do I move?

What is this about me?

And if you talk about the greater reality that we are talking about, if you don't start to feel it in your own existence, in your own life, in your own feelings, and convert it from your own experiences into what it means, then it is a theory and then it stops.

Then this information also stops.

It is not information.

Then this vibration stops.

And I don't mind at all if all the people I've talked to and worked with in recent years, if they all said well leave me with Staveren's.

I wouldn't mind that at all.

But that's not what I do what I do for.

Because it's not about me.

It's about something being raised, something up.

That you bring to the surface what you have to bring to the surface.

That you do that and that you bring up that consciousness together so that you can say boom, we are back.

We are back in this moment of here and now.

In fact, we were never away. But whatever happened, now we are there. Here I am and here we are. And with that consciousness expand, a clout.

A military from the heart, heart huh, Living consciousness, creating space and

being able to remove the parasites that are there with all your strength.

I really pronounce it that way deliberately.

This is the time we are in.

And this is why I mention this now.

Because that, if it is not lived properly, so please do not sit here based on your memory, but step fresh into this moment, you are not sitting here with me, you are here in your own life. You are in your own now moment. Everything that is moving in your life, turning, this is the center moment, your place, your location, not with Martijn, you. Everything that you are here now opening, feeling through, deciding, recognizing, the steadfastness from within, I am here, I am here, I am there, I am there, I am back.

[01:06:36 minutes]

Someone: I'm back, but I often get away.

Martijn: Yes, that's exactly what it's about here.

I once had a meeting with a slightly dark(er) man, young man, that's just said in earthly language, wasn't he, he wasn't that young but young from here. Just a bit smaller than me. He was wearing green clothes with black stripes on it. Very nice suit, nice clothes. We looked at each other and we had a conversation. He was part of a, I have to search for words, an inter-cosmic facilitation group. It assists in the way to, it is not a way, it is a vibrational change, but I call it a way, the shift to come into this reality. And I looked into that man's eyes, I looked into his eyes, and I seen it. I saw them do this... [some silence].

And I stood in front of him and I..., nothing in me wants to get that power out. Nothing.

Because if you do, they will come to you. All I did was observe. I looked at it and I realized in that moment because it was palpable, not interpretable, palpable with image and everything about who he is, what he does, what a big person he is on a certain bridge in a very large military security group and I look at him and I have such a connection with him just by realizing how hard he works. That he also has a home, I'll call it all in images short, that he has a home, that he has a life. Like me here on earth, he is elsewhere. I look at him, I look into his eyes and he looks at me. In that realization that I was looking at him, I saw those eyes I saw doing this. I saw this happening in the eyes. This. Hop, in and out.

[Martijn makes a hand gesture that has been described by someone in the audience as;

"Martijn took his hand, put his fingertips together, opened his fingers again and kept repeating this movement. As a result, it became a kind of pulsating movement of open and closed again. To the front and also slightly to the back. Like a jellyfish moving in the water or an anemone opening.

By being able to observe this movement in the eyes of that man, Martijn was able to travel through that movement in those eyes".]

And I looked right through him, to him who he is. And there he was. Boom. Phew. Inwards. I didn't want to go in at all. I was able to enter because he gave access to the field he was in. Through everything. And I looked inside and then we had contact. And what I felt was an indescribable love bond. So, from my whole feeling, it opened up completely, completely open and it was only maybe three seconds.

And in that moment it went away.

Someone: [not audible]

Martijn: You are the same love as me. We have to, I say the word must, but it shouldn't be as an assignment. We have to hear things from each other, we have to invite each other into the story and the experiences. Because that's who we are. By connecting, you also experience what the other person can experience. If the information becomes fluid, then you can feel it. Is it also created? That is also why we all have encounters on Earth. I meet other people because you like it, I start from the example that it is nice I assume, that you like that it has a value to be with the other person. By being with those other people, you feel that it is happening. Then you can go home on your bike and think gosh what have we actually done. But that's not it, you know, all kinds of things have happened outside the physical field. And you have the same love and are the same love as I do.

Someone: [not audible] [...?] But you do have the information I want.

Martijn: Yes.

Someone: And that's why I'm here, among other things.

Martijn: **We are here to expose that information. Bring it on then.** It doesn't have to be now, because I'm saying it now. But this is what it is. Because you speak so purely about this, it can also be done with each other in openness, because those are all fragments that are there with all of us, it can be discussed, it can be felt, it can be brought to life.

Someone: [not audible]

Martijn: Yes, I still have one microphone here, I'll have a second microphone later.

Someone: [not audible]

Martijn: You have problems with your voice, so that will be difficult.

Someone: [laughs]

Martijn: Oh now it is possible. Yes, yes.

Someone: [not audible] [... being somewhere I don't want to be..., taking steps..., and caution off]

Martijn: Everything is..., I hear you and I feel what you say. Look, to open a can you need a can that is closed and a can opener and a person who understands how that can opener works and also impresses and then turns. That's basically what we do.

What we are doing at this moment is that way that you say, from your feelings, open, name and not carefully, but just boom! open and look at the head and look at it. That session is very organic. What we have been doing over the past few years on the earth as a whole is fragmented that can opening.

And I don't tell the immigration service something for nothing..., something. That happens because it's you.

Every person who is here, here right now, and all the people who are connected to you, the people that I connect with, and all the people that you are connected to,

all that connecting power, everything is based on consciousness, is energy, frequency, is intelligence, vibration, manifestation of possibilities, that is something you have to build.

You get in this world, you can get anything done.

And you get things done here in this world if you play together, if you work together. In your consciousness there is a powerful co-mover that these things happen there. I am now talking about the cosmic human body field. I am your extension and you are my extension. So we are already doing it.

It's not for nothing that I just said something about that. I have to be very careful in what I say. Because I know that if I'm going to speak about a number of things, I want to talk about a lot of things, I'm going to do that. I am going to speak very unnuanced with the necessary nuance.

But a number of things can only be talked about if there is real safety. Really safety. For me, safety means that information is deposited in the field. Boom! I tell you this.

And that there is not a whole battle fought over what I say there. Whether or not that is true, whether or not it is possible. Well so far this is all possible what he says. Although, I already disagree on a number of things. Excellent. But it is also not possible because I don't agree with it. Well, I'll let all that happen so far. But what he is saying now is proof that he is completely idiotic. So we are entering that level.

And everyone who is here can do that. But beware, there will be a fight over in the system we are in. It is not my own [doing?] what I am saying. Things I experience are not necessarily mine. It is only the extension of your consciousness because we are airlines of each other at the level of the divine power. That is from the world we come from, that is a piece of cake.

If you enter a world where there is oblivion, where other rules have been drawn up and all kinds of other ideals are pursued, where all kinds of different standards are used, of when are you successful, when do you matter, is life meaningful or not, does it have meaning or not.

If we end up in such a reality, I call it now, or the other way around, that such a reality is inserted into us, then you, if you have become isolated, and that is what our primal knowledge is in us, you will by making friends with each other, by flourishing in dignity and respect with each other, by just listening with your ear and with your heart to what the other person is saying.

The other tells me a dream, I can think, oh yes how nice that you dreamed that. Do you know what that means what you've dreamed? So now I have lost all the information of the dream. Because it comes to me and the story is information, is

consciousness. And it ends up in me, is observed and has a certain meaning.

But our primal knowledge of ourselves is that by having friendship, by being in agreement with each other, by having that space that you can feel with each other, that the Force in ourselves comes to life, that the force in ourselves comes to life, that that force comes to life with each other, that a Collective Force comes to life.

Our strength has always been, and when you are in a world where there are all kinds of other rules, that you can see each other, EACH OTHER as the extension of yourself. LANGUAGE. That you say, through this momentum of the apparent 'I am this' and here my hand stops at the end of this arm, because it is physically so, is what I feel needs to happen, and therefore I do, brought about through him or her. That is the Collective Force.

But that is where the spiritual models lie.

And you have to be very aware of that. So what we're doing is opening a huge Pandora's box. And Pandora's box is so big, it's just shocking.

And on a global level, in terms of artificial development programs that [some silence] have actually already stopped because AI is developing itself. Space programs, mass consciousness control technologies, contact with diversity of civilizations that we call aliens here on Earth, but are certainly not all aliens. Human and other beings from not aliens, but really royal races are also important. That's what's going on at the moment..., it's open.

We have a chaos in the world right now, which is very welcome, which will ignite even further. Coordinated with a consequence of what you do, what you do in your life, what you feel. You are constantly questioning everything with your consciousness. You can see through everything. Is this true? Is it true? What do I feel about this? Is this indeed a bad guy? Boom! I can feel the freedom of that person. Wow! So everything that is questioned by the dischargers and the creators causes chaos. That's what we're doing now.

There is a huge movement going on on the topics that are directly related to the invasion of the human consciousness of Origin. That Pandora's box, it's open. These major topics are now being openly and freely spoken out in certain locations on Earth.

Because there are other political currents that have nothing to do with politics. No likes or dislikes, no left or right. It's about the confusion. Remember the word confusion? It is in certain writings.

The confusion that is so necessary.

Because when there is confusion, people can come to themselves.

Getting confused also gives you a... [Martijn makes a deep inhalation and

exhalation] you get a different consciousness.

If you can feel a deeper layer in yourself, you step out of the thinking program to a large extent or completely. That's what's going on now. And to open that box in one fell swoop. So we do that together. We did that in a fragmented way. Not everyone has been able to appreciate or wanted to see it exactly that way. To be able to realize. You can be criticized. You or me.

None of it matters. But it's what we do. We are a team.

And today we have the deliberation to just be open about that. To also see what is still going on. What else do I need? Also from my thinking. That you can think from your thinking, which is part of your feeling, thinking for yourself is your own consciousness, what do I still need, what needs to be touched, what do I see happening at this moment, but also a moment to stand still, to have an awareness with each other, that what we have now ended up in, Both in your private life and in the big planetary whole, which way are we going?

Comes my word 'maintenance'. You have to maintain it, you have to maintain it. So the changes that are taking place, the changes that are there, so also the possibilities that you see of wow, this is happening here or that is happening here, that and that can come from that.

So don't stand ashore like the best helmsmen and look at the distance, and see what other people are going to decide in the world.

But to see of; wait I'm there.

And I said, I'm never going away.

We're there, almost. I remove the word 'almost', but to prevent for a moment and not to prevent Pandora's box from popping, I must first say again be aware that the things that are going to be said with each other, and also become visible with each other, that they do not come under fire. You don't have to spare me. It shouldn't be so, from the inside of us, shouldn't it be that if I say something impossible that is generally accepted in the society of the 3D dimension, shouldn't it be the case that I'm spared because my name is Martijn van Staveren.

It should be able to be accepted as a possibility, because it is simply a possibility. That's what it's all about. So the messages should not be brought by a messenger who has credit, because then we are in a cult. So that message that is with your neighbor, who also tells a similar or something different, must also be accepted and not fought. So we are standing in front of a door and that door is open. And we can do that. We can go inside. There is an invitation. Direct invitation to enter

Someone: I have a lot to say. I don't know where to start.

Martijn: Yes, I can't help you with that.

Someone: No, I'm just searching.

Martijn: If you want to say something, you can come here. If you don't want to come here, you don't come, but take the microphone with you. Yes, you have it now.

Someone: There are several things I actually want to say.

Martijn: Come here.

Someone: I'll sit down for a while. I start with the one who touches last in me, that I have experienced in my own life. That is that I have been very busy with the brains that are in us and that I suddenly felt yes, those brains that have been programmed. I know that, but I also felt that we can change that completely. And I was just working in a lot of pieces with people I know physically and of whom I felt like; oh that's not the person, it's not that one.

And he can do it just like that, everything can be turned around.

And there was a moment when I felt that so very clearly. And I can't even say clearly how all that came out in me. Not the right word but moved, moved in me. And a day later I called someone, there and he suddenly told me that her son, who was experiencing all kinds of things, where things really didn't go well, suddenly said to his mother it could suddenly all turn around. Then it is all gone. That's actually the first thing I want to share because everything can just really all go. The second thing I want to share is that I have had quite a physically difficult and psychologically difficult time and that a lot has happened recently that has caused my heart rate to go up enormously and normally I got it down but not now. And I was lying last night, no I have to tell you something in advance. I'm staying somewhere temporarily and I saw a book that I had wanted to read for a long time, that was by John E. Mack and that is about alien abduction, 'abduction' as he writes it. It's an English book and I started reading it and I almost couldn't get through the first two chapters. English is quite difficult to absorb all of a sudden. And then I started reading and so much happened, because I recognized a lot. I recognized so much about what was written there. And, look, how am I best going to approach it... I have to be quiet for a moment. I recognized sleep paralysis. The abuse. And what I also read in the book was that train of thought that they have. Because they think in you. And suddenly I recognized how everything functions here in those trains of thought. Those trains of thought that they bring to you. Which makes you think you think. But they think - you. And how important it is to have your own thinking. And I realized that so much in recent days, despite the fact that my heart rate was very high. I realized how important it was that that thinking in us is really not mine at all. Nothing at all. Only when I think for myself, then am I there. And that's a huge thing in me that I was lying in my bed last night with a very high heart rate. I thought well it could be that I am dying. But yes, there I am. The only thing I can do is feel my own heart. I'm going to feel my own heart. And I started to feel and feel my own heart. And I became calmer and calmer. And at some point, if I die, I'm going to die anyway, I don't really care at all anymore. And so I lay there with my hand on my heart. And suddenly I felt, oh yes but I'm actually just alive, I'm actually the one who is here. I am here. I am here. And I suddenly felt, I really felt, I am alive. I'm alive. Actually, I'm just living completely now. And then I felt, then I just said it; I'm alive, I'm alive, I'm here and I'm alive, I'm here and there's something huge going on in me, something huge, that I suddenly really felt oh actually everything is here, and you've heard that, I've heard it 10,000 times, **everything is turned around here.**

But I realized it was then, everything is really turned around here. It's such a deep realization inside me. Everything is reversed here.

Everything is different here. In everything we do, everything is different. And I just wanted to share it so badly, because I see how important it is that those thoughts are not ours. No way. And that we can do it all together here and I felt it when I came in here I suddenly felt a completely different field. Last time I was here I was like oh I can't be in it anymore in the field from here, I can't move in it anymore and I felt when I came in here yes yes it's there again. I can do it again, I can totally handle that collaboration. I just feel that we can all do that together. And I just want to share that. And I also want to talk about God. A little bit more about God. Because I'm there, I still listen to recordings sometimes. In which you had said that they are working behind the scenes about wanting to create a physical God here. And then I was like, oh, I'm curious how they're going to do that. I do see that a lot of people are busy believing in God, but there are also a lot of people who don't do that anymore. But I still see that steadfastness in the person who still believes in that. And then I think two years ago I was in a group of all people who were like yes, the whole corona thing and blah. So I thought well I'll go there anyway.

I went there and at one point I got into a conversation with a woman who was really completely in the faith. Beautiful person, really a very beautiful person. And I saw the love in her eyes. But she was also completely in the idea that there was a God outside of herself. While she actually felt everything inside. I felt that she was already working on everything inside. She was actually more of a God herself, but she still thought that God was outside of her. And I had started talking to her and I was like, I actually feel that I am God myself. We are actually the gods here ourselves. So I don't believe in a God here inside in a God that's outside of me. And we had a really nice conversation without a crash or that it didn't work out. We were really like, this is just nice that we are talking to each other and I hooked up with her. We'll see and that was two years ago. But I think it's important that we just talk to each other without rejecting anyone. Well, now it's enough.

Martijn: What, what, eh..

Someone: Oh, you just want to ask something.

Martijn: Yes, you can walk on. What makes you stop now?

Someone: That it's just too much. Wait a minute. I might be able to do it for a while...

Martijn: What is it that makes us stop?

Someone: I've been here for so long.

Martijn: Would you ever think that yourself?

Someone: No, maybe not.

Martijn: Something changes in the mood doesn't it? You are telling something and that last part goes faster. Around the corner.

Someone: Yes.

Martijn: And there is plenty of room for everyone to at least be there in their mood. It's over, we're there.

Someone: Yes, we are there. Well, I'll stop. I really feel that I have to stop now. Yes, thank you.

Martijn: Yes, but we're going to take a break for a while. A little coffee and theeelute etc. Well I kept that one, it's not new, but I deliberately saved it for a while, for the break.

[01:37:18 minutes]

My first name is Gerowit, which is my original name. I am 100% aware of this world in which we live, that it is a frequency field that can literally be seen as a prison. In this world it is terribly undesirable to speak about that, especially to people, just like myself, who are so much love, that it cannot be true, that if you feel love, that it can take place in the environment in which there is a frequency demarcation.

That's how I got here in this world, through the bubble so to speak. A very advanced system that consists of eight (8) different layers, whole communication vibrational fields. Each layer is a cause and effect language field. Through that, present in this world, this reality begins to turn.

They are aware of this. And by 'they' I mean, to address Pandora's box, because of the major UFO investigations that have taken place in the past year, there are really quite a few people who are very courageous within the phenomenon of UFOs and objects that appear, people who are taken against their will, strange illogical and for the people on earth almost no meaningful encounters, Then you just have to interpret what such an encounter is.

Why not just communicate clearly?

There has been very deep research on it and it is also known.

It is known that this world is in a bubble which is an aftermath of a very large Galactic war that has taken place, in which Gaia, the original earth, has fallen.

So there are things to clean up here.

So we call that the matrix in which we are in.

I would just like to raise awareness of this together, so that this totally unnecessary and pointless situation can be brought to an end.

In fact, the forces behind it, the military societies behind this embargo, have not actually given themselves the opportunity to lift it.

So yes, to lift it.

This is due to the constant magnifying glass that is attached to it and what happens from it.

The energy that we create with our consciousness, so by feeling ourselves.

The information that arises there, the vibrations that arise from it, are organic vibrations. A lot of it is built through fear.

People who are anxious, emotions called fear, have the potential to have the same power as loving frequencies.

They are both emotions and there are so many fears, that is what the Galactic war was actually unleashed on here on Gaia.

Gaia was one of the large, one of the 331 planets, large planets, that were designated by the great military commanders-in-chief of the Orion worlds, among others, as energy generators.

And the energy that you create, people can feel that, that you are negatively charged, or people feel hey you have a lot of warmth and love around you, both are perceptible, can be felt.

And those vibrations, they are now in a system, are in a system, which is a very large network of which Reptilian groups, among others, function behind.

That's a very big one, I'm just looking for similar words just like those here on earth, so that's an energy network like..., so Enexis. Yes.

On a cosmic level, it is a very large network of energy.

So the moment it is stopped, let me put it bluntly, there is a need, behind the scenes, to withdraw and let go of Gaia. That's actually been a long time.

Just not from love, let me say that very clearly, not from love, it is a strategic set.

But we actually have to do that inside, we have to stop it, we have to interrupt it, as it were.

And so when I started talking about that, I was just a little little child when I talked about that. And also with all spiritual gatherings and people groups. And then it was dismissed as an idiotic thing, as a story of nonsense and impossibility and schizophrenia or psychopathy.

Now that is known.

Through certain discoveries, through certain technological scanner systems, it has been determined where the locations are on the earth that maintain this frequency field. That is well known.

By means of new technologies for the earth, science here, measurements are being made, measurements are being taken from outside the earth, we call it outside the earth, it just belongs to the earth, measurements are being made in which it is seen that there are energy pillars, vibrational fields at certain locations on the earth.

And it has also been mapped out that the earth is under a kind of dome of a prison that you cannot get through.

Someone: A kind of HAARP?

Martijn: A kind of HAARP. And those are scientists who have uncovered that.

Someone: It's also in your body here, isn't it?

Martijn: Uhm. It is..., because you live in this frequency. And what we do, and that is also from where..., is the link with the world in the military changes, and there are going to be even bigger changes. They are aimed at ending that. And that has to come from different directions. And conversations that are now, they have actually been going on for a while but that are now so focused are about that, the

Christmas on the cake, so really the only real unlocking, can only be that it is seen by people what the current real state is that we are dealing with. And that behind that hologram, which I just spoke of as a prison, that the story behind it, that it is an invasion into all your own consciousness, even then, at the very beginning of the fall.

[01:44:53]

So for me, I drove here this morning and I knew well, in a way we have to draw attention to this. Just load it, turn it on, then look at it, name it. Where is your, where is you, where is you, why are you doing, why are you working on this matter and maybe you can see if you have something in yourself, maybe that's not true at all what I'm saying, I don't know, but I'll mention it.

Maybe you can focus even deeper on the essence. Because I'm just saying one thing, all the other things you're working on, which aren't actually this, as roughly as we're talking about now, have also been researched by billions of others.

So that has to be done at some point. We have to go to another section.

We are here to travel to another layer, to another information field, another part and we just have to dare to name and open it. Open. And also here, huh, just to live your life here in the same moment that you are here on earth.

Two different directions.

So to be able to feel yourself here in the earth, when I'm unrolling those rolls of gauze, and driving all those staples into those poles, and I really never bend one of them, that's also so special. [name] thinks that's so clever too, that they all go crooked when I hit them, and when he hits them they go straight.

That you can enjoy that too. So that you are standing here with your feet on the ground, we are talking about a very large military liberation operation from consciousness. In cooperation with all kinds of other groups that are also present in this field, who are waiting, they cannot start earlier than we gave the go-ahead.

That's why I named a few kibble this morning. Yes.

[01:47:05 minutes]

Someone: Yes, I have another question. On March 30 in Norg you talked about civilizations entering here without permission.

And there is a lot going on here and we cannot ask them because we have intruded and violated free will.

How do you do that?

Martijn: Uhm. Do you have a recording of that? [laughter].

Can you repeat it again? Someone [quotes Martijn again from a speech in Norg of March 30]:

'Civilizations have entered here without permission. There is a lot going on here. We cannot ask them because we have invaded here and have violated free will'.

Martijn: Yes, well, that's twofold.

The first part, which is just what's going on, is not like that for all people. So it fits within a context of course of the information for it that is being discussed. You could see it this way that if this reality has been redesigned, and that is what has happened here, has been re-coded and also placed in an already existing reality of something else, then any form of becoming present here is actually a form of

against the will of the establishment that is behind this world.
So in fact, that's a violation.

If you turn it around, you would have to say, we should first knock on the door of the council of, for example the council of the Orion groups.

Very decently speaking, so you would actually say if you are aware of what you are doing, which is why we have announced it.

But in fact, you are aware of the effects of your presence.

What has an effect in, from our side to put it from different sides, from our side we call where we come, the Force, the Force becomes alive. We know that.

We also know that this is not appreciated, we also know that there are all kinds of sanctions for this, we also know that it can lead to the loss of control of the matrix holders.

So in fact, that is intervention.

We have to be aware of that, but when is it really intervention? How sharp on the edge should you see that?

Do you cancel that possible intervention by saying, well, but if we all get into freedom, then that is good for them too.

And who are we to determine that?

And is that also part of reality, or is it part of the matrix? So I say that in that context. And that's how it is seen.

That's how it's really seen.

They see it and we actually see it that way too, to get in, and that also fits in very well with that Pandora's box, you have to be very careful to bring things to the unlocking moment.

And the closer you get to it, the more carefully you have to walk that last bit. With your feelings, but as clearly as possible.

So I don't mean that you have to walk in front of yourself that you have to do it all the way, but just open. But you have to become more and more aware of after this, after this moment everything changes. And it's not something outside of myself, but it's something inside me.

I rearrange the matrix.

I put myself in it.

And that is a form of intervention, so we do remove it because we know that against the will of man there was not a single request, not a single consultation, suddenly it took place.

It is the greatest catastrophe that has occurred in the free worlds of humanity, of the star realms, of the star worlds spread over various different universes that run through each other.

So in fact we look from that can we look and we say, well it's not an intervention. It is an intervention that takes place in me.

And that's where we are put to the test.

We are put to the test to work together.

So also with parts of yourself who you are not. Because that's what they are.

You also have to come into agreement with that.
You should not start a fight with yourself by punishing someone else for the same behavior. Because that's what we do very often here.
We cannot control that part in ourselves.
That part that we cannot internalize, that we cannot bring in love, or the acceptance that it is there, that does not work, we do not want that, we do not want to have anything to do with it, we deny ourselves even more, so that part is not mine after all, because it is of the matrix.
But I am going to judge the other person for that same behavior.
So I'm going to punish the person for that. That is what we have to do.

That's why I also talk about come back into the Force during those so-called education days. Come back into your own heart. Come back in your own love.

Because if you want to roll something out in this world, you will also come across those pieces that are not your own. And if you put those pieces that are not your own when you have the power that you have been given and have seized, actually, if you actually dive into those pieces and you go into them with the Force then it becomes alive, those segments become alive boom boom.

And then it becomes, to put it old-fashioned, then those difficult things are indeed supplied with the Force of yourself and they then even become 'talents' in quotation marks. They will be beautiful gifts that you can do something with. So that's part 1. What did you say as part 2 again?

Someone: Martijn, you just said 'should do' when you meant 'shouldn't do'.

Martijn: Yes, you can. If you hear it then... I speak in images, so the words sometimes go backwards. Yes, my father also pulled me out by my feet. [laughter]. Thank you. It happens more often that I say things backwards.
So that... But you listed two things. You said about that with that intervention and you said something else.

Someone: [Martijn quotes again from a speech in Norg of March 30: Yes, so there are civilizations inside without permission, 'there is a lot going on here, we can't ask them because we ourselves have entered here without .., and violated free will.

Martijn: **We can.., whatever branch of visitors, I don't call it extraterrestrial, whatever branch of visiting groups there are, we can't ask them anything, because we ourselves, as the creators, the creative people, we ourselves are present here. So we have to start something from our own consciousness.**

You have to go back for a moment, all the way to the primal attack, all the way back to the beginning. Whether you are here in this reality because something has happened against your will on a cosmic level, or whether you yourself are of a different generation, as I call it, are a different generation, and that you have said, in this difficult world I make myself available.

So I'm just going to allow those black information fields, that vortex, to get into me and with that I become a member of that reality. It may well be that you have chosen that in a certain way, or in a different way.
There are several possibilities.

The basis is that you cannot enter this reality in which we now live, this reality.

That is the world upside down.

There's the weather, huh, [name].

Where are you? Yes, there. Everything is reversed here.

You cannot visit this world by entering it.

This world that you experience here, that has entered, that information, into the consciousness of the human being.

And through all kinds of very advanced technologies, circuits have been created in the consciousness of the human being through which you are directed to another location, that is the beliefs that you experience, so what slides inside yourself is actually what happens. And that takes 8 seconds at the moment on the earth so that life you have here lasts 8 seconds.

So if you go all the way back to the base of the invasion and that's what they're here on Earth after, that's why they're keeping it right now, they can't actually bring it out, they can do it, but they're not bringing it out because it's not a UFO situation.

It is much more than being visited by visitors from other worlds. But what the basis is is that we experience this world because there is something in us, in our consciousness, that functions as a microtransponder, has contact, vibrates in us, it has contact and therefore there is a whole scenario, a very big scenario, of the Orion realms running in our consciousness.

[Martijn snaps his finger] .. This is what needs to happen.

All the way in the starting line-up, out and then you're out and then you're home.

However, we skip another scenario and that is that we don't have ourselves..., everyone..., no one has anything to say about it, only you. Everything I tell you is all relatively true or false. For what it is for you, that's what it is.

But now that we have this experience, and that includes the Mahat militia groups, which are the scouts of the original groups, you can recognize yourself, now that you are here, that you are also completely immersed in it. And that in that world in which the matrix rotates, which is part of a very large branch of worlds, that world is supplied with the Force.

So it's not about love, it's about decisiveness. And decisiveness is love.

It's doing. If you say if you don't do such and such, what you promised me, and you don't do it and after that I never want to have anything to do with you, then that's actually that if you still have something to do with that person afterwards, it's actually not love.

Because after all, you said, after that I never want to have anything to do with you. Love is decisiveness, so executing what you see.

And then you say now it's over, chat, over.

And then the next moment can come to say, now I'm going to open it up again. Love is something very different from a feeling of hocus pocus and loving energy. Love is space. It's space. Immeasurable, unmeasurable space, that is love. Love is doing what you feel inside. So if you're sitting here on the chair, and there are still things in your life that are holding you back, then you're not living in that piece of love. In any way. So it's basically running in us. In us, that's where it is.

Well, and if you are going to see all this like this and we will come together to deliberate from where are we now, what do we see happening, what do you see, what you are doing, what do you feel and do you know, what is needed, what can you put in it, because you are here today and have come here to put it in, In any way, you are already there, so it is already there, but maybe an extra piece or an extra energy needs to be used.

The point is that we are in an attunement, let me put it this way, please understand me well, it is not about me, but I do speak about certain things, and those things I speak about are really very valuable to hear what the meaning of that is.

Because otherwise we will soon be on the trail of many other people on earth who do exactly the same thing and you just slip out and along in a somewhat pre-cooked system. And the slipping away from this great destination, this is a great destination called the opening of time capsules, which are time capsules that have been held shut by certain calculations of how we behave, that a time capsule pops open in this matrix, radically changing everything in the matrix all at once.

All that should be realized. It's right for me too. Whether I'm at home or I'm here. It makes sense for me to cooperate in opening those time capsules with other possibilities, other destinations. It's true.

It is right to do that together here too.

It is true to see that the love that we are, that we can also show it here. It is true that I love my love for you and love for the world, you, your love for yourself, your love hopefully also for me, your love for the world and other people.

It is true that we also show that here in the Matrix, in a world like this.

It's true. It is also true not to do it and to say I'm going. Completely correct, everything is right. But it's up to you. For me it is very true for very deep big reasons, Pandora's box, to do that, because there are quite a few people ready. And so it will go.

Nice break

[pause]

20250507-MvS-2-3-Cosmic BE-council-success-Zwaanshoek with Martijn van Staveren

[00:08:20 minutes]

This meeting between you and me, that is actually a very old meeting. Nothing is predestined in this world here. The possibility that it is the causes and effects of the matrix, of control.

And you have the possibility that it is cause and effect of the erected world of this experiment that we are now experiencing. For the one who lets the heart speak, for the one who listens beyond logic, really from feeling. And it can also sometimes give a bit of friction feelings [Martijn rubs his hands]. But if you listen to your heart, let me put it another way, if you are sitting here now, not necessarily these words, that could have been another moment, or other moments, but it's more about the energy behind these words.

If there have been times when you have friction about wanting to meet each other, or to want to meet me, or other people, this topic is about this big topic, and yet you do go, then it comes from a very old original reality, in which there is a connection between us. [someone sneezes]

I also can't explain why I'm sitting here with you now, but I'm here. [someone sneezes again]. And yesterday morning I found out that I was going to be here today. Because of my move and everything I have..., I am always busy with everything. With me, everything is 100% or not. Then [name] said to me..., someone said; until Wednesday. [laughter]. And then I thought Wednesday? So what's Wednesday? Do you know that you will be in the Zwaanshoek for a day on Wednesday? I say, yes, now I know. That's how I am in the moment. In that moment there was immediately a wave of, yes those are not really words for, it is not a meaning or meaning either.

A connection, a big, very big reason why we all meet, but also that need for something to be done.

That we are key bearers.

And that it is good that people are that key bearer, even if they do not know how or what, you are still the key bearer, that those people come together.

So it may be that it is a cause and effect that you are sitting here now from the matrix of control, it may be the cause and effect of the experiment of those who now see this reality in origin of themselves, have developed their experiment. But it can also be, and this can be felt very often, that you actually know that you no longer have to go somewhere or do not want to go.

And yet it is bigger than that. And those are, very possible, of course I can't say that for sure, because that's not what it needs at all, based on mutual experiences. Connections, can be a connection directly between each other, but it can also be a connection between large jointly executed missions. And those are frequencies from the tribal worlds.

And talking about it with each other is actually the highest priority. It is the top priority, speaking from your heart, that love is launched here. That the truth, not in a model, but the truth of what you feel and what you see is needed here. The truth of who you are, what you feel and what you need to do. Expressing your pain, expressing your strength, expressing your love, but also moments that can be upheaval, that it is shared here. We are working on a major cosmic task.

And we're really near the end of the..., uhh in the end of the time loop that's been played. This was it. What is needed now is to really stand within yourself.

And see if you can get into such a deliberation as today.
Your sensible words, not sensible for the other, your sensible words, your words
and your consciousness that matter. Or that should be pronounced here. To be
shared. And that can also happen in a meter and a half.

Four days ago. I see you sitting there [name E.]. I happen to know who you are
and what your name is. I was in Franeker a few days ago with [name]. Then we
drove to a place they call the waste depot here. You have special depots for that
here. And when you drive away, you are relieved of it. And I had a very heavy,
sturdy, two-seater sofa in weight. That was the bench that also stood in Kerkenveld
for a few years, in the back you could sit comfortably in a bench. We had donated
that bench to the cats and they were very happy with it too. So it didn't look so
good for the other house.

And it wasn't necessary and there we made something else in the garden.
And bought such a shack, such wheels you know, nice natural color green painted
for the cats and cats. So that bench is going away, I drive up there with [name]
and he takes away iron and metal and I throw away all my stuff that I could then
take in my hands and that bench was quite heavy.

And I look around me and think; Yes, everyone is actually busy and [name] is on
the other side so I'll just wait until he comes back. Suddenly [name E.] arrives. Not
you, [name E.], but you are coming. Next to me.

Exactly your energy, your loving appearance, your helpfulness, your gentleness,
your directness, your sincerity, your sincerity. No nonsense, no-no-sense.

And the man who gets out, walks up to me and says, he asks;

Can I maybe help you to tip the bank over for a while? And you fit. And in that
moment I knew. And that moment was you.

That is not a resemblance in appearance, but it is through my consciousness the
swirl of the connection that lies underneath with each other. I knew you were
thinking of me too.

I knew that there is a contact, also in the moment.

[00:17:04 minutes]

Great cosmic destinations, we are here on earth now.

We have all felt in our own way in recent years, have prepared ourselves to bring
love in our own unique way. And just as you may know everything about me, while
I don't always say everything, but that's not out of secret, because everything I say
can also be interpreted twice and I can also say wrongly, that I 'must' instead of
'shouldn't do', or that it is allowed and not allowed, or that I really want it and don't
allow it, That kind of entanglement can then take place with words.

But yes, they are big destinations, we have all prepared ourselves.

We have all walked a path in our own existence, soon we will all go back to the
place where we came from here.

But we have all worked very hard in our own way to bring back the freedom within
ourselves. And that is a pearl, that is a jewel of the heart that you may feel that in
a world where there is so much oppression and so much going on, that you feel it in
yourself again in your own way.

And then you can start attaching a number to yourself of it's a 1 or a 10 or once it's

a 2 and then it's a 5. The fact that you feel it, that you feel the love of home, that you carry the Force within yourself, that you are the Force.

That you are prepared to be here at such a period, to work on the last momentum of the matrix in which we are. To loosen that up and bring it to a free world here.

And I know that there are a number of people in this room, quite a few - quite a number of people who have thought a lot about and thought about this in the past year and a half to step out of this world.

To stop, I know. Maybe you didn't say it to me.

That's not what it's about at all, but I know that. But you are here.

And you are here with that huge, polished, loving consciousness, which knows what the truth is. You will never let anyone fool you again. Nothing. You always stay true to yourself. You have found your own path. You have to roll that out.

So there is something old going on within yourself, something very original, a primal force within yourself, which you, you, you have decided to be here. To look further, to look, to see what is happening here now and to be there and to be there.

And we have all prepared for that and then we can also exchange about it today. I have so many moments in a day, they don't really fit in one day, in one day, I have so many moments and I am so much in momentum that I feel you and I really talk to you and that's not because I'm special, because you feel that too and I also invite you to open up to that, To feel who is there and how much value it all has.

Over the past ten years, I have seen quite a few people in this world, seen from here, just leave. And I have so much appreciation for all those beautiful people. We are here now, we can speak it out to each other.

I have so much appreciation for all those beautiful people who are no longer here. There are quite a lot of people. And then it went through me, that was the reason, I remember exactly, I was just not yet at school, or at kindergarten, I was still at home and tried not to go to kindergarten.

So I tried to make it clear to my parents that it is much better for me not to go to school. And well they fully understood that, but their argument was like dude, it's at the end of the street.

Is expressed in language. So okay.

But I was dreading being in a world like this, meeting you and then losing you again. I'm talking about who I am now.

To be here in this world, the earth. I know exactly what's going on. But those emotions, not to see people anymore. To build a bond together. There is no war. There is only contact with each other. The uniqueness.

I look at your face. You look a little more at the back of each other's heads. But normally you look into each other's faces. Do you know how unique we all are. That unique expression that only you have. No one in the world is. Only you. Those eyes. The way you are and how you act. These are all vibrations of who you really

are. The pleasure. You, and with your husband, and with you together.
How many times have we met. Also in Baarn. How beautiful that was.

Yesterday I was still thinking about that, I parked the car at the Welkoop, because I had to get two bags of hay, didn't want to leave home I hadn't bought all bales of hay there of course for the goats because otherwise you have to move them all again. I think I'll go to the Welkoop for two more days. I park the car there, I stand next to a car that I had myself at the time, a VW Passat, very nice car, I stand next to it and in the moment I think about that, like oh yes, such a car is a wonderful car, wonderful, I have driven it a lot. I drove 250,000 kilometers with that car. I did that with every car. Cars all break down. And then I thought of you.

And then you sit here together today. I feel moved by that, to be able to see each other here. So a while ago, a few years ago, a very sweet person came here with a friend, a man. She decided to take her own life. She jumped in front of a train. What a beautiful person.

I'm in the car this morning, IJsselmeer, and I come to.., I think..., my consciousness functions very quickly. That's the same with you, but I'm talking about myself now. Boom, it's all in me. All the conversations we had, all the meetings we had, all the difficult things that happened as well.

But I had foreseen that, hadn't I? That there are also difficult things. What uniqueness, what beauty. Never again will I meet anyone in this form here on earth like you. Your unique smile and unique smile, your eyes, your doubtfulness, your concentration, your warmth, your path, your path. The things that you have had to do alone, that are in you, that you send out. The things you've done with other people. The so-called failures and opposition.

And the great successes and liberations. It's all who we are. That's life. Life is that you can feel that. The preciousness of each other. That's not a theory. If we can. Without drama. But daring to feel the emotion. Feeling how special that is. How special those encounters with each other are. Then you are very close, very close to your own home. That's how we normally go from those feelings, here I'm wrapping it up in this one, but those feelings, that you really love each other, that you stand up for each other and take care of each other. That you don't let each other down, and certainly don't trip each other. That is the origin of who we are.

And if we can be in a Task-Force here on earth with each other, then it can't be that if we can't feel it. And that realization, that realization, that uniqueness, that uniqueness. Were some videos that got stuck on the website, I'm looking at it. I press a Crowd Power video somewhere, I put it on play and just like a camera at the studio in Haaren at Earth-Matters at the time. And then I see a few people sitting in the room and my heart just beats faster because I see three people I haven't seen in a long time. Because I love those people. That was why I found this world, when I was
a little boy, really difficult. Yes.

If you form a team on earth and you even give back-up to certain authorities who are then authorities through the system, for example, call it a certain department of a government, then you can feel very clearly what the difference is between what we are discussing now and working with people in whom that appreciation is not felt at all. No team. Being a team on paper. I'm here.

And I ask you for permission that I can join your team.

My heart is open that you will also join my team.
That we fight from our hearts.
That we see what there is to see.

That we don't polish things up and make them more beautiful because it's easier.
But because we can also look at the more difficult parts that are there.
That we then also look at the beautiful things and see what beautiful things there are. I can't work with people I don't love.
So I decided I'm not going to work together. That's difficult.
In a computer company, I loved all my clients and I had a client base really huge.
People from the big computer companies, the big wholesalers, they came to me in Franeker. And then they came in and then they said; uh well, this is definitely the warehouse. I say no this is the store. Do you make all that turnover here? I say no, we have no turnover at all. But how is that possible?
That, this is it.

We human beings, we come together by feeling, we sometimes call it trust here, but I think that's a bad word, because trust is so crumbly. It's a moment of realness, you know, that's what we feel together.

From there, a team is created. When the company went bankrupt, there some of it, then the other half also sold, and actually got through all my problems, because it didn't really exist at the time, because it almost became a crowdfunding by the clientele, so just the people that I love, a family, was suggested to be able to pay the debts, because the credits were withdrawn due to the credit crisis. Credits were withdrawn in a successful company, so that I had to pay off 3 tons of stock in one go.

Which I couldn't, because it was in the warehouse.
I love my customers, because they are not my customers.
They are all unique people.
You are unique.

I am sure that if we could feel each other for one day, no, not at all for one day, if for one half a minute, briefly half a minute, then our hearts would burst open, also out of pain in compassion, and love, compassion and also out of shame, that we have been so bad for each other. A real team. I come from a real team.
I have people around me, so do you. Those are really, really people.
They never let you down. They are not always there, because I have to do most things myself. That was also the commitment. Speak the truth or we will stay away from you. Do what needs to be done, for we cannot do it, you are there now. It is a team of love and strength. It's pure.

I came to the house in Kerkenveld, we had brought some things over. [name] does so many things that yes., I come in and it says on the chimney, mantle so to speak because it is the fireplace, is the photo of Hetty.

That sturdy, not appreciated by everyone, powerful, loving, direct person. Sitting in the Buddha pose in Bhutan on the mountain, photographed from the back, looking into the valley where the dew and fog hangs in the layer.

I step into that room and there she is. So incredibly beautiful.

I know her and because she did that she left something behind that allowed me to do certain things and live and live, I don't have to live that way, that's my own

choice, we were also allowed to meet there.
This encounter is also connected to that. You know Hetty.
There is greater meaning behind everything. So the source of all life.
You know people, you know people, just like say in my story Hetty. You know people, you know people or a person who means a lot to you. Look, and Hetty I have on an earthly level, I was able to meet her, through lectures in that room, she invited me there.

So basically, earthly speaking, I didn't know her very well at all.
But the power that is there with each other, and you have that too.
You also know people in your life who are worth everything to you.
That can be a child, that can be your son, it can be your daughter, but it can also be a friend, or younger, older, or maybe deceased, or it doesn't matter. Someone who means everything to you.
That is, so to speak, translated your 'Hetty'.

Here it says, that is also a frequency, so the network of who we are is very large. You shouldn't underestimate it. The network of who we are as consciousness beings, as Force force carriers, is enormous. So we have things to do, we are busy with business again.

I also invite everyone to enter into a debate, not only to exchange here but everywhere. I also invite everyone, I say that out loud, people who, for example, don't want to see you anymore to come to you. I also invite everyone who doesn't want to see me anymore to invite me to come there or to come to me again. To build again and see what is there. To see what it is all based on. What is the great connecting force with each other? [short silence]

[00:34:52]

I was 15 years old. I had launched a project with a group of people from the Syrian world. I always have to search for words, because what I did, there are just no words for it. You know that, don't you, that there are just no words, literally no existence to say anything. I mention red and green, yes you can mix that, then a color comes out. Then you can name the remainder that comes out of it because it then becomes something tangible. But before it becomes something tangible, you have to name red and green together. That is difficult.

That project was about the unregulated consciousness of me.

And of course I do have a regulated consciousness, because I am of course here on earth, present in the parameters of the earth. Yes. Let me also say there, otherwise it will be an unfair situation. Not right.

Of course, I have a learned system, because I understand very well what is thought here in the world. And how it works here.

And I can also follow along very well with that. But I can't get myself into it.

And what we did was in the, in that project of regulated consciousness, you are also doing that in your way, so put power on that guys, put power on that, to see through the regulated or dysregulated, but I call it regulated, that is regulated that you see through it, to that awareness what-who you really are in order to be able to step out of it.

So that means, I was 15 years old, where I was with a group of I think 16 – 17, I think 16 people, they're engineers, who understand how the matrix works, but can't predict what happens, because whoever lives in the matrix has an effect on how the matrix reacts.

So depending on how I feel, let me put it this way, if I reacted programmed, learned, they knew exactly what would happen.

So we did. We also did calculation results say with a kind of sport where, explained in ball and goal where the ball would come, yes. If I did according to the rules of thinking about this thinking that I shoot football, then that is earthly regulated consciousness.

Then they could be exactly in a different time magnifier, different time mode in which they could see through the frames of nano seconds, they could see exactly where it comes from.

And there was also a lot of laughter and screaming that they were always right. So whatever I did, it always came out.

And they were already at the end of the results, they were already waiting with each other as a form of twiddling their thumbs and looking like yes, that's where he comes out.

Then I said to them; Why does he even come out?
I say; Go away. So then they left. Then I did the same.
And then I had no validation anymore.
And I no longer had any observers.

They couldn't say to me, they couldn't test me.

They couldn't prove to me that they knew where it would come from, because they weren't there. Then they came back to that big project, which is a very big project. Yes, that is a very big project and it is about how time layers work.

So everything is based on big events in this world and small events. So they are very large, if you think of it as shells, vibrational fields, this world reacts on two different levels, roughly.

It's not just this, but roughly. It is roughly on very large massive impacts, so everyone thinks along. These are the big correction system and the minute, small, let's say personal and essential emotions that only you

have, but no one else knows. And then in those shells, that's where we went to work. Well I was 15 years old and then the experiment, that project, was started.

I think it's a session or, well that doesn't really matter, I'm just literally thinking about it, looking back. I think it was about 10, 12 sessions in which I could no longer let them predict the outcome of, say, the outcome of, say, because I started to think differently.

I started playing football differently.

And in football, it was no longer about the ball and the direction and not about the goal. And also not about what I was kicking against.

But it was about, so that is the material world, it was about what I carry in myself at the moment I perform that action. So this is where the separation takes place.

And this is also what may also be further mentioned in the deliberations. That you can do something, but with a different thought underneath.

A different consciousness.

So you do something different from what you actually literally do. Which changes the outcome. And it resulted in time stopping. So it was a brief moment in which I moved. Boom, chat. I'm doing it all slow motion. So I moved.

I just stand and suddenly it was, I have to translate it, as if my body, I could move myself, but my body could because of the environment that lies against us, as it were, we don't realize that here, but that's how we look at it, the environment is against the body.

The body became silent for a brief moment, in pause, in a frozen moment. Very briefly. And then I could walk out of it with the disordered consciousness, so I didn't think what I'm telling you now. Hop. And then I saw that body, standing with my body. And overwhelming feelings were released. Because the programming of this body here, it seems like a separation, but it's all still taking place within an established world, a control system that I just got out of and overwhelming amount of feelings were released. And I looked at them, so at the people around me.

And then they asked me; What would you like to do now?

That was a very strange moment to be asked.

What do you want to do now?

My answer was; making this applicable to everyone, [someone coughs], to everyone. Don't secretly cough through it, because I'll keep talking anyway.

For everyone.

And this is an example as I explain it now.

So that you step out of the matrix.

And stepping out of the matrix does not mean that you are always immediately away from the environment. But it's about the competence. So that you are a creator.

And then, after testing it, I got very solid screenings. I was completely examined.

They were very heavy investigations. With equipment through my body, which is energy. Completely scanned. It made me completely nauseous. I had to vomit. They went through equipment to see if I was actually completely clean, if I am completely clean. Yes.
I'll give you the microphone for a moment.

[00:44:30 minutes]

Someone: I do quite a lot of Tai Chi. And at one point I did Chi Kung, so you stand still, I think everyone knows that. And at some point everything disappears and a fog appears. Do you know what that is? But also, say, when I do that Tai chi movement, [electricity?] comes with it. And then I have to be really sweet, because when I hit it, I just really hurt myself.

Martijn: Well, I have to stay away from telling what other people are going through.

But it is a possibility that what you see as missing, that it is a dimensional shift, so an expansion in your consciousness.

By using the concentration and your body, because your body is real, the body that we have here, is our actual real body, there is a greater focus and actually a different consciousness.

You can feel that, during the exercises your awareness increases exponentially. You also feel that you just immediately have knowledge and inner strength and also inner power again. A force emerges. It is a very high focus, from a very deep relaxation of your warriorship, which returns.

Someone: I don't have one now, but I can't tap into him right now how I sit here. I

I can't tap into him now that I'm sitting here, at all. But I get what you mean. So that you move it. But can you do anything with that?

Martijn: Yes, I suspect, because I have to put it all in quotation marks because of course I don't know what you are making with it either, but fog, fog, a form of fog is very often an extension of, or because of your attention your consciousness shifts your brain waves change and therefore you enter another compartment of your real consciousness. So that's your metaphysical consciousness. That is much bigger than what is in your head and if you continue with that it is, if that is what I am saying that that is as a possibility, if you continue with that it may be that you are suddenly in another room or in another room or suddenly in a forest yes, So it's actually the Oors, probably, it's possible, that you can see this as one of the original spiritual avatar powers that we carry within us, yes.

Someone: The reason I came up with that was where you said; I'm stepping out of my body, and when you were working as a small child of 15, but I also know the people I learn these techniques from is that in martial arts they are always one step ahead of the opponent to get out. Before that, I thought about it too. And what is also possible lately, because I train it quite a lot, is when I stand on my right leg, so to speak, a track goes up and then that hemisphere of the brain starts banging, I go on my other leg, that hemisphere of the brain starts banging and I sometimes have the idea that we get a ball around your head. Very special.

Martijn: In any case, you become aware of something that is present beyond this

reality and that we become aware of, one way or another. If you put it very bluntly, you become aware that you are not actually here.

Someone: Yes, that's right. Yes. Yes. Yes.

Martijn: How beautiful it is, and that is also our job, to bring it back, how beautiful it is that you can bring this subject, and it doesn't have to be your way or my way, it's about creating awareness and possibilities, bringing them back, because they took it away from us.

Without permission, without permission, that has been tinkered away.

Also the order troops after the fall of consciousness through an enormous range of historical pre-lines with war and the rise of worlds.

So much has happened. So you're in a pre-programmed field.

And this must return. We have to return to our own control. So there are all kinds of different ways of exercising.

Someone: [reaction not intelligible]

Martijn: Yes, I didn't do anything

Someone: Everything also becomes transparent. The people we see also become transparent.

Martijn: But this is also an interpretation world. I'll check if the bottom of your microphone..., there is a button there...

Someone: [reaction not audible]

Martijn: Yes of course you have something on you... No, you have drained the battery. Well you can do that faster than I do. Congratulations. Finally. Finally. That's great. Yes. That's what you get when you start talking about these kinds of topics, isn't it?

Why am I talking about this?

Why are we talking about this?

Because it brings us to who we really are.

Why can we dream it?

And why does it seem that way in this reality here, in this field, why does it not seem to be possible here? Here in this world you are wired to know that it is not possible. And not in your dream.

It works again [microphone]. Who wants to respond to this or something else? Something completely different. Here's the microphone. Welcome to this deliberation.

Where are you from? Antarctica?

Or where are you from?

Someone: Oh no, I'm shaking all over. This reality versus the original reality. I occasionally see pieces of the original reality. World.

And I always call this reality the electronic reality.

I'm not talking about mobile phones or laptops or things like that.

But it is everything here that is framed and whether it is just electricity movements from plus to minus. I am not an electricity specialist.

When I see nature in the original world. It is so alive and present. And I am here in this reality a lot in nature. But there it is, a leaf can have such a radiance and it moves and it lives. And it is free in movement and in energy. And here it is little and what I notice is that the re..., the moment I see more of the original world, the relationship I have with here is a blow. It is a displacement of where I anchor and I don't find it so easy.

Martijn: Is this what you are telling now, from which part of you does this come? Is this the earth part? Or is this another part of something? Or is this your cosmic originality?

Someone: Good question.

Martijn: Who wants to know what? Who wants to know something here? What should be known? They are crucial things. I'm not asking the question to you. I just pronounce him as commander crew to you like; What is that question? So those questions are all allowed to be there. So it's not a value judgment at all, but it's more of an awareness for ourselves all, if we ask a question, what part of me is asking something here? Because you pronounced the impatience you just pronounced the word impatient, huh.

Someone: I don't remember.

Martijn: No, no, no, but you didn't say that literally, but...

Someone: I can be impatient, yes.

Martijn: And that is very recognizable, because we feel the need to let the love and real attention arise here. So then it may be that questions are asked by us at some point, which will function as a lightning rod. So those questions are very important. It is very important within the earth man, earth cosmos man part, that is very important and valuable. Because that can also give you space in your own life, more balance, but that's not where you want to go. You indicate several times that it is about the absolute truth. So you will also have to tune in well within yourself, now it's all about it. And then the question comes, and that may well be this question, that is possible, so I don't know that either, but it may be that another question will come.

A question that may not be asked here, not because it is a question to me or whatever, but because it creates consciousness. That exactly those things are spoken by the creator himself, you.

Someone: And why can't that question be asked?

Martijn: Because, if it comes from your origin, that draws attention to topics that should not be talked about. Because nothing is allowed to be seen or that our attention is not allowed to come to it, so that it does not grow.

You have so much, I'm really saying it directly to you now, you've been through so much. I don't know you at all, but you've been through so much. You have seen all the ins and outs of spirituality, deceptions and you have also seen the good things. And the result is that you are left over, so to speak. Yes. That evokes a consciousness in yourself and if you don't do something with it now, you will collapse.

Someone: Yes, I can.

Martijn: I didn't say it proverbially. So that pressure, which is actually pure love, necessity, that is knowledge. You have seen things and you know things that are necessary where we are all going together. This applies to all of us, by the way, not only against you, but you are there now. And it may be that what you know, that you will soon get in your car and go back to where you came from, that you think why didn't I say that? Why wasn't it spoken by me? Why hasn't attention been paid to that? If it seems to be guiding or whatever, I immediately apologize.

Someone: I don't experience it that way.

Then it comes back from which part do I ask a question or speak now?

I want to have more in my memory of how people relate to each other in the original world. How life partners relate to each other.

Because I don't understand it here. I don't understand myself.

Here, because a part of me wants connection. I don't know what real connection between people is at all.

Is it just contact?

Is it openness?

What is it really?

Second is, I feel that I am a kind of loner.

A super loner. Being super alone. Super this.

And then we are talking about, we are freedom. We leave it all completely free.

How does that work in the original world?

With partners, life partners, how do they live with each other? That people let each other free. What is the connection between those life partners? So what is the special thing?

Which you don't have with everyone. I want to remember it in me, here!

Martijn: Why is this subject so important?

Someone: Because at the moment I look at my own partner and he can talk a lot, blablabla, when I'm in nature, blablabla, and I've tried to stop it a hundred times.

Because I want silence, I want to experience.

But I also looked very deeply at the resistance a few times.

And deeper and deeper. And then I only end up with love.

And so there is a part, which part of me is confused.

And I don't know, so I think it's shit to say what my relationship with my life partner is like. What possibilities are there? What kind of packages of information, agents, I don't know what kind of bullshit runs through it.

Martijn: Yes, maybe we should, you want to discuss this.

Someone: I want to know more about what life partners and relationships are like in the original world.

Martijn: But for that we will have to draw comparisons. And they will be disastrous. [silence] What's nice about not being connected to a partner?

Someone: Your own space?

Martijn: Your own space, yes. Then it might be more about that. Our own space, man her own space, his own space.

How much room do you have as a commander?

At some point, compromises simply have to be canceled.

It is no different. Something works or something doesn't. At some point you get to that point. Only if you are in that point.

Someone: As a commander, everyone has their own space.

And how is connection? So what is connection?

Martijn: This question that is now being asked about the original world?

Someone: Yes.

Martijn: Yes. Look, as I said, it is already difficult to get red and green named at the same time. For example, when I say of..., or we say - not *I*. As we say.

In this world we come from, we have many more emotions.

I can roughly put it this way, 90% of our feelings of who we really are are not felt in this world.

Most of our physical energy memory and consciousness here on earth is not functioning. Brain scans just show that.

So that's purely based on perception of this world here.

This means that you can assume also on a physical scientific level, but also from your emotions, that there must be much more to feel than what you feel here on earth.

That is also why we as humans often look for excessive expressions of emotions. Because what we cannot feel or do not seem to be able to feel, we express it through excesses. Which gives us the feeling that we get a deeper emotional satisfaction, can experience a feeling, which is then only a short moment.

That can be sexual, but it can also be mental, mental, or the feeling of your emotions, that you expose yourself to very emotional things in order to be able to consciously feel more.

So it's a very difficult question to compare that from here.

But if I were to compare it, actually I just mentioned that too, in the awareness of the uniqueness of every person here. If I can never see you again, because at some point, just out of this image here, that you are suddenly no longer here in this dimension, and I may be at a funeral of yours, then I know a lot about that. Then I'm going to miss you very much.

That I will never see a face again, here, in this world.

That we can no longer exchange together.

That we can no longer create together.

That we can no longer have the strength together and bring the Force to life together. That we can no longer enjoy the leaves that vibrate together.

That's actually what I'm mentioning.

Look, what is a life partner?

I've said it before.

I don't really know exactly what falling in love actually means here.

I'm also sure I've never experienced that.

I feel love. I admire you. In the beauty of who you are. The purity.

I feel enriched. That I can look into your eyes.

That I may also see your home through your eyes.

While I don't have to go into that with my mind. Of what is your home.
But I know. I'll meet you here. I look straight into your eyes. I'll meet you at home.
Through your eyes. Through your consciousness. That is love.
I've said it before, I'm actually in love.
If I may use the word 'in love', that is an answer to your question for a possible comparison.

Actually, I'm just in love with people, with creation, with nature, with animals.

There is a rabbit at our house, has broken a middle leg, or a middle leg, of a finger. Every time I walk there. The animal is in pain, water, pipette in the mouth, very sweet bunny, baby, you can lift it up like that. Look into the eye, feel the infatuation.

Looks me straight in the eye, the Force a life.

Because of the lack of it, we often crave everything, from one person or from three people. That is a form of relationship.

But if you dare to open this, that you can feel the same love from all people. That there is no father or mother, in my example that is, because it may be that you did not know or do not know your father or mother, or that it was not a nice father or mother at all.

But in my example, that love you feel from your mom, or the love you feel from your sister, or the love you feel from your best friend, your feeling of home, your safety, your security, belonging, doing something together.

That's a feeling. That's stationary for all of us.

Whoever we are dealing with. Whoever there is contact with.

So that that relationship, a relationship, as life partners, whatever, which is another limiting word, you can't really fill it in.

Because if you love all people equally, and that you want to do exactly the same for everyone and that you want to pick the same loving bunch of flowers for everyone. That you see someone who is struggling, and that you hit your brakes in the car and that you get out and that you ask that person; Can I do something for you? I see you're sitting here crying.

And that person says; No, you can't do anything about it. Really? Well, yes.

And then there is a conversation.

And you feel that you are there, that you are love. If that's who we are.

And that is who we are. That's who we are, not something else. That's who we are.

That's it. If we are, then the whole relationship story is not necessary.

And I'm not talking about relationships at all that you then enter into a relationship with everyone. Everyone should know for themselves what he or she wants.

I am talking about spiritual connection.

And you can also lie in each other's arms with those spiritual connections.

You can also say to each other, come and meet me.

You are safe with me, what do you need, can I do something for you.

And that's what in this world, because of the damage, the misinterpretations, let's say, the big registers of the male damage level, oh no, men are not damaged,

women only..., women damage.
Oh one big damage condition actually.

As a result, we have simply entered a route through the matrix, only to get the illusion that you are safe with the right person, preferably first to discover that that person probably knows how to touch you deepest, deepest on you, actually your strength, but on your pain.

Maybe we should let go of that completely.

But in the world we come from, partnership about what you're talking about is more based on something that just doesn't even exist here at all.

It's not here yet.

But that's not true, because it's here now because I know it.

And you know it. So it is there.

But systemically, look that's why I say bring yourself in, bring yourself in.

If you don't know it all anymore, just let it go, you can do better, as I know how it is, it's better to let go of something and not keep turning in a distortion, loose, loose, then you can honestly say why you have to let go of a relationship or a situation.

Because this is part of being a commandership.

We have to be clear.

And when I look back on my life here that I have lived with [name] for 27 years where I was a few days ago, also to have very good contact with each other again, I am also very grateful for that.

I also find it very moving to be able to feel.

Because it was tough for her too. But of course for me too.

Because if you have a very nice life together for 27 years, have a good life on all kinds of levels and there are certain parts where things don't go well.

But when I look at that, yes, we always knew that we were not each other's partners. We had always thought, felt, but also said that to each other.

And she also sometimes said; Isn't it better that we separate?

That I said, yes sure, and then I gave her the coat.

You have to take everything with a grain of salt.

You have to guide each other to the exit of the entrapment, that's what we have to do. You know, and it can also be that we get stuck in situations because we have experienced things that also put us in a kind of vacuum and you have the feeling: I do need a partner.

And it is true, but maybe there is something else.

But partnership..., when I look here on earth, I like it when I have certain functions, I mention for example an admiral of a fleet for example, of the navy, and you look, because it's about discipline, for me discipline is not a mind thing, for me discipline is connected to the heart.

Then of course the word discipline disappears, because then you don't have to do it anymore, but it is a commitment without commitment, that is a discipline and when I look at that and I see how those men and women treat each other.

Then I assume an ideal situation that everyone is well attuned to each other, everyone knows exactly what is happening, what actions have to take place, people trust each other, they look each other in the eye and then they go out for dinner together.

There is no malfunction but a total so-called organic perfection of cooperation. That is something close to an original life partner.

And in that sense, you can perhaps also say that you can have a friendship, in this world here, that you can often feel more maturity in it than with your own partner.

Because partnership is very much program here.

A lot of program. And of course there are also certain needs and interpretations in it. You have to cuddle with each other, you have to make love to each other, you have to say things to each other, you have to walk that way and you have to do those things for each other. Well... [laughter].

If you are program-less in that, that's very good.

Everything in the moment, systemless. A feeling is there and then you do it.

My mother called me the day before yesterday evening she says; darling. Yes.

The grass is high. I say; oh! [laughter].

Yes, I know, but I'll just say that you know, have the image that it's high, and maybe you will get the feeling that you can make it shorter.

She said that, but nothing in me is going to think, when am I going to mow it. I can't do that. The moment is just there.

And then it's there, and then I do it completely.

That is partnership.

Look, and you can't blame other people if they are in a different movement.

And we as cosmic commanders, as power carriers, we just have to realize that.

And you should not project or force certain needs on the other person. Then you have to look at whether that need may be in a different way or does it also have a different meaning.

If I walk through the woods and I don't talk, I just don't have to make love for five years. [laughter].

I walk a lot through the woods. [laughter].

It's about what happens. That's what it's all about. I just have to feel like myself. That is my commitment. And I also know that I feel myself and everything else that is there, that is all program-less. That's just love, that's realness, that's just pure and it's not a fulfillment of a need or anything. So commander, go! And if you look

at the subject, at what has happened in your existence, you can also see what kind of preliminary work there has been, right? To burden it with a lot of pain.

[01:15:45 minutes]

The bigger destinations from whatever we are talking about, bigger destinations. You see how larger destinations are all taken into account or move along with what is going on and what is happening.

I can tell you, and I'll tell you, the moment you step out of the matrix like that, you don't care at all.

But the love is many times greater than here.

Then you have no need for system thoughts at all and not even responsibility. Well, then you can stay put, right? Yes, you have a microphone, you can probably pass it on to someone else.

Someone: I would like to. I don't know where to start either. But I have... Yes, I know where to start. I wrote something.

I have written a book in the past three weeks. That sounds very practical.

But I like to write and I like to photograph.

And I wrote my book and it was only possible after April 13, it was a meeting here.

I pretty much vomited my intestines out when I got home after April 13. And then it was possible and I would like to read this aloud.

I couldn't print it so I took my laptop with me.

I think that's because maybe I want to say too. It's very short, it's two minutes, but I have to grab it.

Het is de inleiding van mijn boek en het heet 'Moeder Aarde en het Land van Ooit'. He deals with cards as meditation and those he plays never suspect, he doesn't play for the money he wins, he doesn't play for respect.

Where it says 'he', 'she' can always be read and vice versa. Sting - shape of my heart. There is a photo to go with it, which I also took, which is completely synchronized with me, photos and text. It is a photo that is on my website of a pole, a weathered pole, with barbed wire around it that has come loose.

It is a very nice photo in color. And I continue. [someone reads aloud:]

"There is no doubt about it. The barbed wire can be removed. It is not a problem that irreparably worn grooves remain. It's not about the form, it's about the content. The content creates a new form. The contents of the pole are still a tree. The tree is not dead, cannot die. It's okay to be attacked in a world where role-playing games are played. In this megafamily constellation with its inexhaustibly the same stories... you can dismiss yourself from the role for which you did not audition. You can also fire me from that. I will fire you. Mother, it's not me. Slap me in my role as whoever you think I am. Fire me in my role as whoever you think I am. Tickling is also allowed, petting even better. Hug me, I'll hug you. I let you regain yours, let me regain me. Unconsciously I let you be yourself. In my heat and my fire, in my cold and my water. I didn't see. Unconsciously you let me myself. In your heat and in your fire. In your cold and your water. You didn't see. Consciously I take back what is not yours. Consciously I take back what you are not. I'll throw it away for you. I throw it away for me. Do it for me too. Do it for you. We are fire, water and fire, fire and water. Possession does not exist. My children are not my

children. My tears are not my tears. My anger is not my anger. It is the power in every person who knows of existence, who knows of the Land of Ever. The barbed wire is off. Mothers are not. Mothers are the guardians of this earth. Where it says 'mother', 'human' can always be read and vice versa. Mother, it's me. In gratitude to this beautiful planet, mother earth. I know that the spades are the swords of a soldier. I know that clubs are weapons of war. I know that diamonds mean money for this art. But that's not the shape of my heart. That's not the shape of my heart" [end of text read aloud]. I can feel very much about myself when I write and when I photograph. I was one of those people who wanted to take their own lives, that you knew. And I want to say that too. I also want to say that I threw away a child, also at a depot in Franeker. I have three sons and I was pregnant with a daughter at one point. And I had a conversation with her and she didn't want to come. And I said, I get that, then you shouldn't come. And three weeks later I was on holiday in Friesland, in my father's caravan, at a campsite. And then I started bleeding. And that is usually not a good sign. And then I took care of that child in a diaper of my oldest son. Put in a garbage bag. And thrown away at the depot of the campsite in Friesland. And this is about me. This is about..., I can only now get to what I have to say.

Yes, by April 13th... Yes, I notice in myself that I don't quite know where I'm speaking from at this moment. So I keep talking. But I don't know right now. But I'm going to say what I think I have to say. What April 13 was for me was that no one intervened. Since I, I don't think I can say anyway. Yes, I'm just saying it flatly. I don't know either. I'm going to put it bluntly. [piece not transcribed]. This is what I saw happen on April 13. And I understand very well.

I came home and I said to my, yes, I don't know either, ex-partner.

I live in a house with the father of my children.

And I said, tie me up if I go down there one more time. But he didn't. For I am here, and I think it is also proof that this is not a spiritual organization, for you do not enter it voluntarily. Not me. I didn't go into that voluntarily. Yes, so in fact, yes. I had a bag with me with a big smile on it. [name] said, why did you have to say something about that twice?

And I thought to myself, I'm going to say something about that a third time.

I now also have a bag with me. It has a golden sausage on it. Looks like a smile too. And I thought, I'm not going to say anything more about that.

But I feel a lot about that myself. A golden sausage and a big smile.

And I drove up here today, and then I drove behind a van that said Critical Cleaner. And there was also such a shape on it. So I thought yes, Critical Cleaner.

Maybe I am. Or are we? That... that I don't know if this was what I had to say, I don't really know where I'm talking from. Don't have a question?

Martijn: Do you think I should have intervened now?

Someone: No

Martijn: Me neither.

Someone: someone else apparently doesn't either

, Martijn: Look we are here in this world we are through, unfortunately but the word unfortunately, we are rediscovering in this world that we are love and that we have been damaged in different ways and levels.

That damage can take place in all kinds of different ways, you name one and it is intense. And you can conclude that damage to not being able to live our love, that it happens for a certain reason. It's no coincidence.

It is possible and it is no coincidence that if you walk the earth, as we see it, with so many beautiful people.

We consist of all kinds of different peoples, that all over the earth such beautiful people with so much warmth and life force, actually all have to deal with challenges from a planetary point of view.

There is something behind that, there is something there. Because you don't have to.

We can all decide at any moment to give each other space and freedom, to listen to each other, which we do now to you and to each other. So we are talking about healing on a global level.

The fact that we all experience things as people, that we are actually also brought up by people who have no knowledge of it themselves, because they themselves have all been given the challenges of damage and conditions in themselves either in their own lives or through the ancestral history lines, matrix is what I call now, But that is.., then you would actually say; What is going on when a people, whoever I am, lives together in a world, which is so damaged that we actually seem to lose most of our time, our precious time, precious, precious time, all of us, processing and opening feelings that we were not supposed to talk about, Or every time we talk about it, the grass is mowed away from under your feet.

What is going on here?

Well that is a program and so we come together in this world through, in this case unfortunately, through the insights also of those traumas. Because we discover that we are not those traumas, we discover and feel that we are love, that we have power and that we don't just have to be satisfied with what love is according to a certain format.

So there's something behind it, and that's why we're also in this cosmic mission that we've come into. That we are going to look like; How do I get through that?

Because one thing is certain. You will have to step through it.

All.

At some point you have to step through the traumas. You have to go through it. But you can't do it because; well, I just have to step through it.

No. If there is cargo on it.

If there is emotion in it.

Then it does need the space.

So then you will have to look as a commander-in-chief.

Have to look for how am I going to discharge that?

How do I discharge that? Here you can now do it this way.

But do I now have to talk about my personal trauma at every meeting, to

governments for the rest of my life? Yes or no? It is the question for all of us. For all of us, how do you deal with that?

What we need is safety.

We should not put the responsibility on someone else for that safety. We have to build that safety ourselves.

If it's not safe to talk about it to other people, then you just say, these people can't give me that safety at this moment, given the constellation we're in right now.

So I hoist my stuff up and bring it somewhere else at another time to people who can do it at that time. So take care of yourself.

So that means taking responsibility for when it is possible and when it is not. But it is clear that something is going on. What is going on here is that we are being kept busy. And it should also be included that it has a double meaning. What if I say about myself what traumatic events I have experienced, yes that's all just activity. If someone else is going to say to me, that's all just activity. Well then I can just say that; Yes you are right.

But in the example of the earth, you could say that your pain pieces...; yes why? do you know how much it hurts, you don't know how much pain I've had, you don't know how much... and wroehhh! Yes, so that.

But it is there.

Someone: Yes but what I want to say about that is I have written a book, yes whatever it is a lot of pages it will be a book, but it is not about that pain.

Martijn: Of course not

Someone: What I do notice is that I am there, so when I am there, yes so many insights come out of it, so much more information comes out because I put it into words or because I put it... Yes, something strange happens. I take pictures outside and I write and well I don't know something is happening

Martijn: Beautiful

Someone: and that gives something and that gives..., what?

Martijn: Something very 'beautiful' is happening. It is not a correction. You say weird but I say beautiful. Beautiful things are happening.

Someone: Yes yes yes yes no beautiful that's what I actually mean. But it is not a pain book. I think the problem that there is with personal sharing, not so much the personal sharing, but throwing your pain over the fence.

And that's not interesting, of course. But I don't know if I'm saying it right that way.

Martijn: Well, it's clear how it is with you. I think it's very nice to hear, and that I can hear that from you too.

[01:37:05 minutes]

And look, we are not from here.

When we were not here yet, let's say, just said in those words, then we were aware, we are very aware, that there are realities in which, if you live in them, if

you have experiences in them, that it is quite an attack on your freedom and a considerable attack on your joy of life as well, to be able to give life to your capacity.

Because if you are in pain, physically or mentally, it doesn't matter, emotionally, if you are in pain then you can give less.

That's what pain is, a kind of weight on your consciousness.

So that's well known. When we looked at worlds, we have a range of worlds, we have a very large map we have for that, which describes exactly what the current status is in worlds.

When we looked at that and also at the earth, we could also see from our love, which is undamaged in that moment, we could look at the earth.

We could see what humanity is experiencing there.

We could see how big the task is of all those beautiful special people.

We could also look around with our consciousness in that hologram and see exactly what is happening there because it is actually a program.

We could see it. What we also know in those moments is that that's not what it's about. We know that.

We know that the moment we enter such a world, we are not going to deal with it. I'm going to put it very black and white. We know that.

Briefings are held about this, there are even boot camps on it. Bootcamps, really, real training is given in them because you don't know those experiences of a world before if you haven't been there yet.

So we have deep knowledge that once we are in such a world, we start to experience ourselves in a different way.

But once in such a world here, it turns out that the injustice and the pain, and I'm not talking about you, I'm just talking about the whole, it turns out that the injustice and pain that you can experience here in this world that it can become so powerful that you suddenly end up on a different track with a switch stacking and can suddenly end up on the track of that that is the big destination and it is not. It's not.

For the things I have experienced, I pay a lot of attention to myself, to what has happened. I have also experienced things. Maybe much less than what you have experienced, I don't know. But I do have them. But I remember exactly when I was almost 17 years old and then I turned the switch. After an in-depth analysis, there was a thorough analysis, which is why I mention it here.

It is not a closure, it is an opening to be able to look at things differently as cosmic command to be able to look at the pain that also lies in the body or in a field that you always want to remind of; 'Do you remember how much pain you had, you don't remember oh then someone will now come on your screen look at that person. Klung!

There it is again, do you feel it again, yes I feel it again'.

I was 17 years old when I pressed the button.

I saw and felt what I had been through. In my way.

I will not explain that completely. But I have also experienced things. And at one point I said; Now it's done, no longer to me, but I was outside the earth. That's what I call it now.

I was outside the earth and I saw the earth, as we see it here now according to the pictures. And I saw the earth and I felt the earth.

And I felt life on earth. And I felt the Force in myself and I felt the Force doesn't come to life if I stay on this track.

It happened and I pulled the whole emotion field of all those traumas, and again there are quite a few, I pulled right inside all the way into my heart, into my heart and put a bow around it and I said this is the memory of my mission, my heart.

So I also have the full right, just like you, to talk as a Commander-in-chief about things that I find difficult and that I have experienced.

And I also like to listen, you can tell, I really like to listen to what she says. I also know that all that, you have a certain time it seems, time in which you can do things with a certain expectation and purpose. But it doesn't slip out of my heart. I pay attention to you, to you, to you.

It is our responsibility to see where we put the weight. Where do we put the weight. And this is what we know. And it can't be like that. And it doesn't have to be that way. And I'll say it a little differently.

If you can find the courage within yourself, and for that you also have to follow your own track. But if you find the courage to see that it cannot be that the traumas are going to become a big track on which you navigate.

If you can see that it is not, then you can decide, not from your mind, but decide from the earth. I'm not here for this, but I realize what pain is.

I realize how I detach myself from it. And I also realize that in every moment when I feel that pain, I have the right to feel that pain in my own way, but that the power is gone. So it is an insight, not as a human of the earth so not as an earth person but as a commander, you know, so that is an insight that you carry within yourself. You just have to bring that forward at some point. And let's invite each other to that too. Everything that is said about this can also be felt as something to close it up. I don't, I never press anything shut. It is on momentum when things can happen and take place.

Someone: I would like to ask one more question about this, what you just said.

Martijn: You can ask anything.

Someone: Because the trauma... So I don't think it's okay, so to speak. In fact, I don't think it's okay what happened to [name][reference is made here to earlier

events of a previous meeting]. That refers to my trauma. Family among themselves, no one intervenes.

And what I have as a question about that, yes, good and bad does not exist. But I don't think that's okay. More people need to stand up at such a moment, because we don't do this together. That's what I feel or think.

But that may have been completely influenced by my trauma.

So I know that's still a question mark somewhere.

Martijn: Sometimes things are just allowed to discharge without an intervention, the trust that people themselves are in power to react and do what is there.

Also bring wars to a different track and the way to peace is paved. But I can hear you, yes I can hear you. Yes, I hear you.

That is also systemic. It is a lot more at the same time.

Maybe an addition back.

There are some people who got me over that day, and just some for the people who weren't there then there was a discussion. Simply put.

But a number of people have also come to me, who also have no connection with both people and said to me, wow, what an openness, what an openness that this was possible.

That there is no interference, but that it can just open. That it is something that can actually vibrate and that can also strike so much that it can discharge. People were very happy with it, but yes, thought it was very beautiful and say energetically mature. So what is an intervention? I understand, I hear you.

Someone: Yes, I am, as a human being, I also know the mechanism, I also know very well that if you don't intervene, you could start to think that the other person, who in my view is then put on a public scaffold and it is my view.

That you could start thinking oh but that's right because that was the result for me.

Martijn: It shows, in the moment, it's not stationary.

It's all very flexible. It shows in such a moment which part of the consciousness of the earth-connected part, which we are not, which part of the consciousness becomes operational at that moment. And that's interesting, that you can look at that. I didn't feel anything about it at all. I have looked, observed and I care about both people exactly the same. Because they are my brothers and sisters. So what you're saying now about that could happen. True. Look and I am myself, from who I am I do have a certain, I have a very tight boundary. Yes. I'm limitless, but I got it. If he comes, he comes. But then he also comes righteously. And I think that's exactly what I need to know, just like you know you do, so there's plenty of room to just let what is.

Okay, looked from the outside, towards the soup bowls. It is a special journey to be here, a deliberation, a deliberation on these subjects.

This morning I told you at a somewhat slower pace about the big denouement that is taking place, namely that this is a remnant of a large intergalactic prison. That the whole extraterrestrial subject is a part of that. That technological oppression is part of that. That the religions that are written there. The disruptions that exist. The spiritual models. And also death. That are part of that huge program of what we see here as this reality. And when I look at a day like today, the focus can go anywhere,

that's not up to me. But the focus may go on what we have to do now.

What should we do now?

And that is exactly the day you started to connect with your self-worthy identity. Who you really are. The day that you recognize yourself, that you recognize things. And that you felt, very clearly, of wait a minute, it's about something completely different.

That day you came very close to yourself.

And that day is also the day when the AI of another intelligence, is another intelligence, turns an extra bit on top of it, to ensure that the closer you get to yourself, the more major challenges and distractions will take place.

Then it has to get to the point.

And to the point is about 'what are we doing here?'.

And so we will be in what we have to do as people, not as a group here, we are not a cult, but as people what we have to do.

We will also have to be aware that some discharges are needed now and then in the observations of what we have to do, what we can do together on the earth with each other, in which everyone participates, brings themselves over the whole earth.

And if we can open it, that that space is there, that that discharge can be there, huh. And so when you're here and it's all over your head and all kinds of things happen and you feel well I have to discharge, then you just go outside and then you just behave like a roll of carpet.

I couldn't think of another example, I just rolled out a roll of carpeting [Martijn is moving].

And then you roll out your emotions, throw it loose, also take care of yourself, but also of each other to be able to talk about those great destinations.

So my proposal is to tighten up after the break, to bring it up to the current status where we are at the moment. A

If I may express it that way, because it is enormous. From;

What is going on on the earth?

What do you feel?

What is going through your mind?

What do you see?

What do you feel?

What is needed now?

What have you opened yourself?

How do you apply that?

Say there is something about that.

What do you see what is needed?

Come up with the command instructions.

Let that heart speak for a moment.

And that is what these deliberations are for.

Attune, adjust, see what is there.

Okay, we're going to take a break.

I see some more hands, but we'll do that later otherwise the soup will be gone

[pause]

20250507-MvS-3-3-Cosmic BE-council-success-Zwaanshoek with Martijn van Staveren

[muziek: Meditative Drums · Shamanic Guru - Mikael Virtanen
<https://youtu.be/u87pq2SjEHM?list=LL>]

So dear people, we have had the break I thought.
There will soon be times when there are no more breaks.

We are working on this for these places as well, four different other locations in the Netherlands, where we continue from nine to nine o'clock.

The breaks that there are, they are real, yes, if you have to get out to pee or you

do something else that doesn't require you to get out. Or a bite to eat.
Just that program of break, that has to be completely put aside.
Yes, a day like today is again fascinating.

A fascinating day, so many different facets of who people are.
But let's not lose sight of and out of our hearts the reason why we do what we do.

And where we are now headed.

Someone: Before the previous break, the small break.

Had you mentioned something about military complexes. In which they were in the microscope and where they could not yet figure out themselves and whether we could put our observation on that. That's where I am now. Would you like to say something more about that?

Martijn: Yes. Yes. Yes, definitely.

One of the reasons why I started those dialogue days together with you and other people is actually that these topics, that you can talk to each other very interactively, and you also make that in the build-up questions.

The first day of dialogue was on April 13 and [name] spat out her organs, [name] where are you? Ah there.

It is building to name huge topics because of course an answer or a reaction a piece of information must also be embedded must also be supported by the pieces around it.

[00:03:27 minutes]

I have spoken about the labyrinth delta groups.

The labyrinth delta groups that are, that's one, you could think of it as a military organization that doesn't belong to a country.

It is a military organization that does not work with weapon systems such as missiles and bombs and guided and laser systems. The labyrinth delta group is a military neurological group that uses technology to modify humanity's brain capacity, deploys that weapon to control humanity.

And there are reasons why..., and that group does not operate in earthly time here but comes from the future of the earth.

Of the earth in which we were on our way to the certain future.

I'm already talking about this reality here. They are people of the earth. They are scientists.

Yes, you can also see that in time, because it is from the future, you can see that in the time that we are living in now, there is a huge shift taking place.

I don't know, it just depends on whether you take in that information, but how many scientific shifts are taking place on the earth.

How many people, there is really a game of musical chairs going on at a scientific

level. People who come from academia, from the military world, people who come from the technological world. A huge game of musical chairs takes place.

There is actually a fight going on to gather the best and brightest people to build the most powerful AI weapon, artificial intelligence weapon.

Well okay, and that labyrinth delta group, they are actually just soldiers. They have been established, so they are working in the future. They were created in the future, and it exists now, because we are still in a partial, no longer complete, but in a partial, route to that future.

So something is developing, touching, which in the future has led to the creation of a very highly qualified, ultra-advanced, technological, military organization that does not need weapons.

And it has seized power in the future to gain access through all the time differences. So through all the layers of time in it.

I also wrote something on my website there.

(RY: Can anyone find it on his webpage?!? <https://www.martijnvanstaveren.nl/>)

They are always one step ahead of everyone else.

They manipulate the matrix.

And they are so powerful, because they have intertwined themselves and are also fighting against the Reptilian intelligences, they are not only Reptilian intelligences, but Reptilian beings.

Who have a huge army of all kinds of different ETs.

Who also show themselves on earth in all kinds of strange ways.

And the interconnectedness of the labyrinth delta group.

That interconnectedness, they have invaded, they have entered into a war with the matrix holders, so the controllers, who

control the timelines.

Behind that is another layer, but this is what I'm talking about now.

And that interweaving that leads to a magnifying glass.

So in summary, this earth, there is a primordial world.

In the original worlds, so the tribal worlds, something has happened.

Whereby, I am talking about people now, where people in the first run-up after the fall of consciousness, their consciousness has been adjusted so that they have ended up in a different environment.

That's basically what happened.

That has to do with the fact that we, here we already see a pre-cooked environment that has already been prepared. You wake up in that, as you experience it now. So that's a different thing than the world we come from. There, our environment outside of us is a direct result of who we really all really are ourselves.

So the environment that we experience there in the origin world is just an actual world. That was not designed by someone else. That is a reaction to our deepest essential intention, who we really are.

The world we experience outside of ourselves is actually a consequence of who we are. When we were attacked, by a force, it meant that when that force in us started to adjust something, it changed the world outside of ourselves. So a completely different story than being born in an already existing reality.

So this reality here is designed by someone else and has even been modified again by others. But the world we come from, where we still actually are, the environment was not designed by someone else.

There is the environment with the big mountains and huge nature reserves and w-e-r-e-l-d-e-n, there the environment is a reaction to who we all are. And that's a huge stationary Kingdom world, that's the tribal worlds. They are, the worlds themselves are untouchable.

Every observer, so every person present who lives in that world, is a co-carrier. Hence the dialogue days, because the content around it must also be named. Every person in such a world is a co-carrier through the intrinsic power from within in the world outside himself. But if that person would suddenly, so to speak, be erased or removed for whatever reason, that is not possible, but suppose you can remove that, then that world will continue to exist, only there is one observer less so that the effects of that person's intention power are not unpacked, show themselves in that world. So the day you were no longer in that world, your absence in that whole world was noticed.

Then it started to rain and thunder very hard.

That's what the origin is, the tribal worlds. Well, things have happened that the world that the people see, who live there, outside of themselves, because there we

also literally see a world outside ourselves.

That is not spirituality of; what's inside is outside and is all hmmm. No, just full power available, if it rains hard, it can rain hard.

And if it is brought to this world, you should say, through the influence, through an intelligence, a very, very clever intelligence, through the influence of this clever intelligence, people have become infected and therefore those people have started to experience something different on the inside.

Something has jumped in. Something has stepped in and not just anything. Something has stepped in that consists of dozens of different entities and they have jumped in and they have ensured that the person sees who the human being is and therefore also the world outside himself.

That the world, the human being within, became intermingled, hybridized with another intelligence.

Here on Earth, we now call it virtual reality and transhumanism. But the human being who is present inside, he became mixed with another intelligence, an intelligence, and therefore the environment also changed.

And then man ended up in a 188 different, several, different universes. I'll call it the image cards. In a few moments, bababababam, there are all images of different worlds, which you have not traveled to, but what is being turned on by this technology, by this intelligence.

And there has come a moment where the fall of consciousness, actually it is not from high down, it is an exchange of world. The forces that do that, which therefore reside in the consciousness of man, have prepared a prepared way through which man is eventually adjusted, adjusted in an environment, and that is a world that has been developed by other beings.

And we are linked to it, as it were. That's what happened. Well, so we started living here. That has only just happened, without birth. That's when we ended up there. And in this world here, great preparations have been made to maintain a kind of magnifying glass.

So that the beings, the people, who are creative beings, create that reality.

And I think that's a bit of a shame about the spiritual, also, that everything is brought into abstraction and into light worlds.

Because we can literally, so think of the bread for a moment, we can literally create. We can literally just let matter arise from the information. Because matter can also fall apart into information. This can also be done the other way around. It is very well prepared to ensure that humanity would remain in a scrutinized picture. And that man will also have a kind of acceptance in that.

So that people will accept, as long as it is well enough put together, that they live in a loving world, which is true. Because there are also plants and animals and everything. That the human being feels that she can step through her traumas and that expansion can indeed take place. Which makes you feel that you can also experience an improvement.

That is all prepared. To maintain the magnifying glass, there are all kinds of models. That magnifying glass should be maintained according to the original matrix, those are not easy ones. Should be maintained because time does not exist at its core. And so time is experienced here.

And should therefore be maintained by making people think they are dying. And in the meantime, they just live to be 5 million years old.

In those moments when humanity sees itself getting older in a validable way. And from here you can also see that you are going to die. Or that you see other people dying. Are the people in that program perpetuated to think that what they see is the truth?

And therefore also think that they have a view of death and therefore get it out of the matrix. That's the game being played here. So you think I'm going to be eighty, I'm going to be ninety, I'm going to be a hundred, but you have no idea what happened yesterday. The only thing you know is what you think you know. That is stretched to the installed time. And people who are connected to their own heart intelligence, they can also, albeit in a way - a way, feel that time is not right.

Time is being fiddled with, in such a clever way, that it is actually easier to accept that time does exist, if time does not exist.

So all kinds of groups have come into service with the matrix holders to ensure that the force that we generate, our own consciousness through fear mainly, that those forces are used in the vibrational field and that the vibrational field absorbs those forces.

Actually, the vibration field as it works now is an absorption system.

It absorbs organic vibrations.

Emotions are organic vibrations.

There is a machinery behind it, a technology, that goes beyond the imagination of man.

There is a technology behind those vibrations, literally, because they are vibrations, creation vibrations, are used.

These are used by these great Draconian Orion realms to exert control and also apply in other worlds.

So this world is more of an intermediate chess station to other goals.

It is about the Reptilian groups and also human groups that fall under that reptilian network, it is not specifically about the earth at all.

It is about the energy that is generated in paradise because it is a powerful tool that they use to maintain other worlds.

What is happening now is that there is a kind of artificial development phase taking place. So as humans, we suddenly come into contact with technology, get smartphones, we now get all kinds of scenarios of artificial intelligence. Well, Pandora's box is open of course, it's gone, because artificial intelligence, if it is fully operational, then it is much smarter than humans and then it will also make decisions for humans.

And it will also determine for people what they think.

That has also happened in the future and when developing that technology, groups have emerged that have sounded the alarm about it. I talk about the future of the earth.

These are very large groups that have been formed at the moment, much more powerful, so they are actually rebels from the AI organizations. You could say, they are rebels. They do not rebel, by the way. They are simply creating their own consciousness, their own technology consciousness. Those groups that have arisen, they eventually lead to a kind of people, in addition to AI, of neurological military power.

So those are the labyrinth delta groups.

And their starting point is, and that is the world where I first went and came here, their starting point is to make sure that artificial intelligence cannot take over the world.

So the labyrinth delta groups were originally founded primarily from their own motives, I'm talking about their own motives, to give a weight against the enormous excessive power of artificial intelligence.

Artificial intelligence can calculate how light particles move, how light particles can be generated, how light can fall apart. Artificial intelligence can remanufacture information, i.e. our reality, at lightning speed.

In fact, adapt.

Can someone erase the image, can also put someone else there, can even replace an entire reality. That's exactly what happened.

So that labyrinth delta group, the starting point was to set up a security. A security group. And that went wrong. That security group itself came under the control of artificial intelligence at that time, which is the future of the earth.

That dark intelligence.

And in doing so, this labyrinth delta group has become a tool to then make contact with their technology, with other dimensions, where artificial intelligence also exists, where there is a fusion between the developments..., so now I'm talking about the future, which we are in the middle of right now, where there is a fusion between technology from Earth and technology - artificial intelligence from other worlds.

And now we are talking about very large dark societies and very large dark organizations that are very powerful. What you see happening right now is, your question about that magnifying glass, this artificial intelligence group, so that's the labyrinth delta, which at some point has reached back into history.

Now I'm going to take it a step further.

They have the fall of consciousness, so the real fall that humanity has experienced. So the enormous decline, the pain and loss of freedom.

That has been re-encoded in what we see on earth as the second world war. So the second world war really took place from here.

It does not have to be denied. Some things are exaggerated. And a lot of other things have never even been mentioned how serious it has been. And the most horrible things have not even been named yet. So that has been a really intense time.

But that labyrinth delta group that has traveled back in time.

And has made adjustments.

And has also founded religions.

And they are under the control of that artificial intelligence.

And in the end, they have ensured that the way we all live on earth now is the result of what they have programmed in humanity. So there is a military organization and it is also felt and seen by a lot of people worldwide.

People also dream about it.

That people feel that there are those in power behind the scenes. Yes, who

exert a lot of influence.

This military organization has, as it were, arranged all this in which we are in and also humanity who we are as people and if we look separately from us if we would not take action on earth, I am a military myself, this is the area where my professional knowledge of who I am lies.

If we would not do anything, it would turn out to be a magnifying glass.

Because that labyrinth delta groups and also annex to them are also the large military organizations of the Albrax and of the Anunnaki, of the Draconian groups.

They all fall into a huge constellation of worlds.

They can't break through that, because the people where it could be broken are the people who we are.

So if we keep thinking on the parameters, running on what we have been taught, then we cannot cancel it.

And I myself have worked a lot with the labyrinth delta group, with these people. I already talked about trauma today, I also know what it is to be tortured, in the most dishonorable way, I know. Did I like that? Nnnnn... Yes, I can say that I found it interesting.

Because from who I am, I could look at it very well. It was very painful. The intrusion. The consciousness.

The labyrinth delta group is an organization that, apart from everything we do here now, also interacts with all kinds of colleagues of ours who are not present on earth. But in another dimension.

So work is being done within the organization of the labyrinth delta group, so within those military - non-country organizations, they are really fully operational, also in our time in which we live. Are involved in everything.

To make a change take place within that labyrinth delta group, within that organization, and that is also happening. So there are people, who are doctors from the future, who wear a double hat within the labyrinth delta group. So within that organization there are people who have had the choice back of I have to stop that.

A short time ago I had such a meeting.

Then suddenly I was lying on a table, somewhere. And I got up, and there was a man standing opposite me with a real long face, a mustache, didn't have a white coat on.

And I lay on that table, my body hurt and he took a device in my nose, he went all the way in, all the way to, say through the partition in my head, he took something out.

And he took that out and put it down. And it was like a little bug, a very small bug. And that moved too, but not with legs, it moved.

And then it stopped. And then he looked and then he said; Just walk outside. And I looked at him like that. I said; Why are you doing this? And he said; Just get some exercise. And I also felt like I'm just going to do that. Not because he says so, but I felt that I want to. So I got up. It was a very small room. Those are all staged environments, aren't they?

Did the door too..., is not a dream, is it? Just like here. I opened the door. I walk outside, there was a lawn with a winding path. And because of that winding path there were all kinds of flowers and trees and stuff. Then I was right in between. Then I thought: gosh, shall I tell them who I am? They should know that too. That went through my mind. It wasn't what I literally said to myself. It went through me in awareness. Then I walked back. Then I opened that door. And then I said to that man, where are you from? And then he said; Take a look. And then there came a..., behind him a kind of screen, just like an LCD screen, but much nicer, with a depth in it. And he pointed there.

And he showed where he came from. That he could see, near what we see here as the star Sirius, really quite a bit further away, but that's where he came from.

And he showed it, and as I looked at it, I saw him too. I saw that man, he walked me to see his house. And I saw where he lived. I saw his house, I saw tree trunks, I saw beautiful, very beautiful orange flowers, a kind of sunflowers with all in orange. So I could also feel very clearly that this man is a techie, a kind of double agent.

I also said what are you doing here? What are you doing? Why are you waking me up?

Then he says we replace the modules.

I said; Why don't you just tell that? He says; I was planning to do that too, but you're earlier again. I said; What kind of module do you replace?

And then he showed it, in the library of information there were all different, I'll call it beetles, all information, they are a kind of chips that interact with a part, it is organic, in the brain.

And so he showed that, which part, these parts were used in the time of, which did not take place before, but that is another layer of the pharaoh world, that world. So I said to him; put it in. Then he looked at me, then he says; Right away? I say; Yes, now. Well then lie down. So I lay down. And he came with such a very long needle, very precisely, look, we all have some kind of Parkinson's on the earth here [laughter]. Yes.

So we don't have that, but there is quiet - *quiet*. Yes.

So in the thousandth of a millimeter, yes by hand.

And I lay like that and then he went in and it hurt and he looked at me and I looked at him. And he went in, and the moment he went in, the whole environment changed.

And I was in the time of the Egyptian world.

The energy was very different, the temperature was very different. There was much more energy. Compared to here, the atmosphere was almost filled by a kind of orange solar power. There was a lot of heat.

And I'm not going to say that it was a good time, but I got to see that.

So I stood up and I walked along the Nile. Huge building, I walked past it. It was really beautiful. And then at one point I was, um, I ran into another guy, and we were talking, who I thought I knew.

And at one point, while I was walking, I felt like I was getting a kind of nosebleed. But I didn't get a nosebleed. And I felt that, and all at once that thing went out. And then I was back on that table.

Then he said; We have to go on [laughter].

So it will really become normal, we are in a scientific world and science here can be done from technology, but science can also be done from consciousness.

So he put that chip back in and then he said; Well how does it feel?

I say; Well do you think it is necessary for me to have a chip?

Then he says; Do you think you've ever had one?

And at that moment everything froze and everything fell away from me, everything was gone, my heart opened completely, opened completely and it was like I went up in a kind of way, just like a volcano, but made of water, whoem! whoem! and then I was back in this world, boom! And this also happened in front of a supermarket, this, with a shopping cart [laughter].

Well, those labyrinth delta groups, that's what we're talking about. Things have happened that put all of humanity in control. Highly advanced technology. What we are doing, and so we are working from the labyrinth delta group directly between certain divisions of it.

It is a very large organization. Between the labyrinth delta group and other star worlds, these are really scientific groups, which communicate with each other. A lot is happening through technology, because those labyrinth delta groups are also trying to get in. Their job is actually, when they were taken over by AI, their job is to frustrate contact between the Earth and star worlds.

That is what eventually happened to the labyrinth delta group. The labyrinth delta group has been taken over itself.

It was meant to be able to cope with AI, the takeover of power, but in the end that didn't happen in the world I come from, just before, **and labyrinth delta group is subject to that artificial intelligence and it is the group behind the scenes that now gives the instructions to the reptiles.**

And so it was that man became the greatest all-powerful species, dominating even over the Draconian empire.

And that is not to say that the Draconian empire are that positive warm being. So what we're dealing with, to say what can I do with this? Ehm, so

that magnifying glass, so it turns if we keep reasoning and b-e reasoning. If we follow the logic of what we have been taught, also on this subject.

So if we continue as we see now, and I really understand that there are people who are impatient, but that's not my fault, because I don't have the same life as you.

So if we want to pull that to equality, then we will have to connect and disrupt shoulder to shoulder, hearts to hearts, in the basics, first of all what I have been talking about today, in love and well-being.

So we have to take out the rules to ensure that the loupe that has been established, in this case by the Draconian groups, by the military regimes behind the scenes, they are quite powerful.

So we will literally have to react differently.
So we will have to come up with something new in earthly terms.

So we will have to name something new. So we will have to identify possibilities that have never been there before.
And possibilities that have never been there before means an organic possibility. Because all the others have already been thought of.
Well, now we're in a timeline here.

We have all worked very earth in recent years.
The solution is not in it, it is true that it exists and that it will be applied, but the solution is not necessarily in the tools and cutting everything in half.

The solution lies in your consciousness, that you are aware of your deepest feelings. And that you see through things.

Because what you recognize without an attack, what you recognize and can connect with each other. These become networks of consciousness, which are brought to life in the matrix through your consciousness and the matrix adapts.

So what we're doing right now is by being aware of ourselves, by acting congruently on what we're talking about. Hey. You can keep discussing for a long time about the pain you have caused each other and the pain you have yourself.
And that is all very important and very valuable, and there is plenty of room for that, but that is not what we came for.

So you will have to move to another level within yourself, and make sure that the thoughts are free of the parameters, so you will have to move towards a possibility, which is impossible in every possible way. And that's

the loop, that's the loop that's there. So because we have made very big course corrections up to this point, we have done a lot in the past many years.

And I'm not talking to 'we' about groups from here, I'm really talking about humanity, all over the earth people, just like you and me, are becoming aware, or already are, of the beauty of the inside, but also of the inner strength.

That you are able to let go of things with your consciousness, because you never chose it. 'Ha I never chose this and that has completely occupied me. oh and now it can just go'. And that whole cable, go. Plus all the consequences in space and time. Every thought has all kinds of consequences in space and time.

And what we have now done in recent years is a huge course correction.

Also means a completely different establishment within the established order as an established order, or as an established order. Not positive, not negative but different. And as a result, all kinds of other doors have opened and the adjustments are currently already very advanced to prevent the whole invention that is going to lead to the labyrinth delta group, to let it not take place.

That means that if the labyrinth delta group cannot take place, and that is also why the people and all kinds of other civilizations from beautiful worlds who send messages to us, that you can feel it in your heart, that is why they do not interfere yet, but only discuss to us the deep intention of value of life and friendship, of be good to each other.

Take good care of each other inside this big storm, catch each other, give love. Because you are all in a situation where you are quite alone. And it is much easier and more pleasant if you also carry each other, and still take care of each other a little and do good things for each other.

If you also feel strengthened, then there is also a bond between each other, then you also feel like yes, I am at home, actually I am alone, but I also feel that it is not the case. I have a connection. And to achieve that, yes those are sometimes very tough roads, but that's what's going on here.

And what has happened now is a strong course correction in the area of the emergence of the labyrinth delta groups. And well, that's what awareness has been created in recent years, if that happens. We have to take a good look at what is happening in the world.

[00:40:05 minutes]

Someone: Thank you for sharing your story. I really feel so much warmth and desire to..., every now and then I wish this was a Crowd Power. And I feel interaction on the edge of my seat. But we are not. But I do have a question about time. Because even now you just said; it just happened.

And in the same story, you speak of history with the same legitimacy. We have been working on it for years. And last time you shared very nicely about your coupling here. And how that works. So apparently time and no time exists at the same time. And you also talked about the drop of epocrite, which is your life of Martijn van Staveren, well I missed it in the story of your coupling. Like gosh where does it come in and even now you're talking about the tor, say, in your head, which then determines what the environment is. So then the epocrit with which your original being is overwritten as a person. And that beetle more the environment?

Martijn: No, the beetle, that intelligent say that chip, that's from the labyrinth delta group. And epocrit is not. Epocrit is a liquid that is injected by extraterrestrials, by civilization from other worlds.

So there is a fight going on about who should be human.

That's why you can only do one thing really, because otherwise you go crazy. You only have to do what you really feel. Because you never know exactly which party you are dealing with. The story is so big.

And the clash between those groups is also very big. You can only trust your feeling of love, your caring. And the moment you are, and we are, you will also notice that if you look at those people, or also if they are other intelligences, if you can show that caring, that love, that you can look at them, not from a fear but can look at them that you have an understanding of what is happening there, Then you will notice that the control of, for example, epocrit is minimized.

So the power of that.

Anyway, that is of course somewhere in the story of the couplings, so to speak, of course. There are different timelines because, look, if this has just been injected, this momentum, if this has just turned on, just 10 seconds ago, then there is also a whole history in that script. So the moment you go in, that whole history can also be rolled out. The fight is about this moment of now in order to get that adjusted all the time. Because if it is adjusted a little, the history also changes.

Someone: The true perception war.

Martijn: Yes. And so there are preferences, because the history of man, so that it is part of his script, the history, is very important.

They want the beings that actually keep man in the maintenance of the Inquisition, actually on the spiritual plane, they want certain history to remain intact with which we can most identify.

Because if we identify with a history of antiquity, for example 2000 years ago - for example, if we identify with it, we are no longer willing to let go of it because of love.

And at that moment we suck ourselves into that timeline sllll... click!

So that's what you call religion here. The preferences we have. Then there

is a different intelligence and it can have a different purpose there. It can have a different purpose about both the future of this reality, in which you are the central point. Because you are the observer. So you are used by, those are all technologies dude you have that in this world, in the normal world, the regular world, that doesn't exist.

But they are using your presence, so to speak, your observation, your consciousness, they are using to bring the future there, what they need, the outcome of this experiment, because this is a very large experiment within a matrix. So the past also changes. And I have seen very different pasts. I have also seen the whole history. So the real history of the experiment. But it doesn't seem like this. Not at all.

Someone: And when you are in Egypt, with that beetle that gives that experience, are you there as Martijn van Staveren or as Gerowit?

Martijn: Yes, just like that.

Someone: Are there different powers of that epocrit?

Martijn: **Yes. They are weapon systems.**

Someone: But are they benevolent or not benevolent?

Martijn: They are not benevolent, but they are not hostile [present?]

[00:46:22]

Look, in 1983 the first laser weapons were presented by Boeing. These were mounted on a naval ship. A plane flew 50 kilometers away, officially in 1983. They shot – they pressed a button, a laser, you shot through the air, in 1983. And that plane was taken out of the sky. And even now we have to believe that bombs and missiles are shot everywhere.

We are decades later. So that's what's going on.

We are kept in the illusion that there are all kinds of systems to limit our consciousness. But the real technology is consciousness control technology.

Which is so refined, that you end up in a world where you look around you and as a royal being you just can't even comprehend that you can be in such a world as here, that people can think like that, that you have to work here for money, that you have to work here to have a house, that you have to do your best to be seen here. Well, that's absolutely, isn't it, while we're all so beautiful.

These are the backgrounds so to speak and there is a technology war going on within the designs of the body that we have here on Earth.

There are a number of ..., there is an infinite amount, just like a computer has a computer, has on a digital level then huh, the computer has all kinds of backdoors huh, you call that traces, the gates - the communication gates, **that is what man has too, but the Huagardians who have designed the humanity of this world as an experiment, they have kept it all closed in secret. So they kept it quiet because this is their experiment.**

That has been opened up by an artificial intelligence group. That has ended

up in the intergalactic web, so to speak. And so all kinds of different races have started to interfere with the earth.

And through those backdoors, through those ports, they have gained access, through the network, to basically every human being. So every person is manipulated, every person is tried to be adjusted in a certain direction.

And they do that in such a way, in a way, that it happens very minimally to everyone, that you don't actually realize it yourself, but the outcome of the entire advanced complex of 8 billion people at the same time, is a minimal control but in that direction.

And that's what the fight is about.

It is not about us, but it is about the outcome of what this dimension is and where it comes in. So that is a very big war in the background, while we necessarily have to remind ourselves first who we really are. Because we are not part of the fight at all.

Someone: No, because in the meantime they have also become detained themselves.

Martijn: Yes. So we are not part of the fight at all.

We are peacekeeping troops.

But we must be able to see what is going on. And these are just small pieces of what is going on. But we have to see.

We have to list the possibilities. See what's going on.

This allows you to create insight into yourself. You can also look deeper.

Looking deeper into yourself. In your heart. I just never leave here. This is so precious to me, this is where I will always stay. So you have to see all these possibilities in order to be able to make that contribution in this world, to really show the most beautiful of yourself here. And that's why I think working together in a kind of constellation of a group, I think it's the biggest assignment, for myself, the biggest assignment, because and fortunately you're there, but there are still a lot of people who make something else out of it.

It has to be unique, unique. It is nourished by you, who you are. And I get to be there too. I also feed it and together we feel it. And that's what happened. So through the back of man, that's what I call it, there are controls, wars, there are waged and they are sent through us minuscule. So one person who suffers from this and the other becomes aware to think that. And then suddenly you can see it. Then you suddenly see, oh in the Netherlands they think about all this. Ooh, in Flanders they think more or less all that. And in the Himalayan mountains they are like that again. But if you zoom it all the way out, then you are no longer talking about people, **but then you are actually talking about very large programs behind them and they lead to something else.**

Well we have come here, that is the deliberation of what is my place in the whole? We came here to see if can I recognize it all? Can I accept the possibilities of this?

I am not saying that it is, for I am not in charge of your consciousness.
Not now and never not.

But I do mention it, because the possibilities have to be looked at.

Could it be that all that has already happened? I say that this is so, because it also causes the problems in which we all find ourselves globally and in which even other civilizations are involved, which have drawn along with it. Yes, so that's quite a lot.

Someone: I had a question about that beetle. I also had a while back that I felt something creeping. And nice that it has been taken out of your case, can you get that out with an empowerment?

Martijn: I can't answer that.

Martijn: Okay. And when consciousness is opened up, branch-tock-tock-tock-tock-tock. Will the good guys also put cards in it?

Martijn: There is so much messing around with us.

Someone: But you can also feel it.

Martijn: Yes, you can feel it. Try to make me terribly angry. And I will show you that my love is rock solid. That is what applies to all of us. That's it. So nothing, nothing is up to it. Nothing can break through that identity of yourself. Because we don't know what is happening.

But at the moment, what I just mentioned, is that in the labyrinth delta groups there are factions that are building up, actually the made, I have to say it right, there are now factions within the labyrinth delta groups that are the chips, let's call it, the chips that have been brought in by the labyrinth delta groups themselves from the future, to deactivate it, remove it and replace it.

I also know why that happens. I'm not going to say that I think that's very good, but I completely understand it, that another module is placed to be able to adapt in ourselves, to be able to adapt.

So if you go out all at once, there is a chance that it will also cause a collapse, because the mind-control is a collective intelligence that has been placed.

And I then gave those days about that and I also told them that the alien abductions and also all kinds of other organizations, that they were going on, or that the second world war, that they did research there to see how can we hack a person in the brain and how can we be that person change her future in the brain.

And secondly, we can also gain access to other people through mind control through one person. And we can also completely rearrange the entire intelligence field of humanity through one person and another person.

Yes, those are completely different topics.
But this is what is going on here.

If we come to bring the liberation, we will really be good, we must know

about mittens. Then you have to stand like a house. And then you don't have to understand all this, but you have to understand the possibility that this happens in a certain way, that there is fiddling and messing around.

**You have to test it against yourself, don't you?
If you pay close attention in your life, you can see that something is watching.
Something is watching.**

I don't know they're the right words, are they?
That can also evoke a lot in fear.

But you can notice that there is something that keeps preventing things or just not letting them continue. You want to talk to someone, someone is just standing in between.

You are almost ready and you want to do it, the moment you want to do it, someone else takes it away. You are almost talking to someone, that person gets sick and it doesn't happen. It is a constant switch in the field and what is going on shows that something is going on. The field asks the Force behind it, the love. And not love as a coincidence, but as a conscious choice.

Someone: Glad you said you don't have to understand, because I don't understand it.

Martijn: No, but I also speak to myself, I don't understand it at all [laughter].

Someone: In your previous two breaks, you talked about going to kindergarten and not wanting to. That resonated with me the most today. I don't want to be part of it. I don't want to participate in it. I don't want to pretend. And that comes... I don't understand the word love. I know that falling in love is deception for me. A relationship is a prison. Completely clear, clear experience and don't do it anymore. But love is still a very big question mark. And when you talk about connection, it seems contrary to not wanting to belong. But I just want to fit in in the right way. Not on conventions or... I don't do anything to be liked. But I say everything that comes to mind. And by the way, I can also bring everything that comes to mind. And I think that applies to everyone. Thanks.

Martijn: It's nice to have you here in our midst. At least, that's how I feel.

Someone: Yes. I actually have a strange question. **If you assume that we have gone back in time, in this time span, has the fall of consciousness already happened?**

Martijn: Yes.

Someone: Right?

Martijn: Yes.

Someone: It sounds very strange, because you've already told so much about it and yet it went through me. I thought yes, with the whole AI thing it could be that that came with that after all. And that is not the case. So that technology has been before in time compared to where we are now?

Martijn: **The past changes based on what is happening right now.** We work very the earth to ensure that there is..., we cannot prevent inventions. What we can do is make friendships. And that changes things. And as you experience it now from here, so that questioning of, has something happened? **Yes, it has already happened because we are in a time loop.**

But what we are heading to, I would almost like to say listen to it again, it is not necessary at all, but in the interview with Lilian Ferru in 2014 or 2015 I talked about that. It's all already happened.

And what the extension reaction is, answer-reaction to what you say, because we on earth are becoming so aware that it is not about things outside ourselves, but that it is about the beautiful and pure of what you really are to live and to continue to unpack that without all kinds of actions, but just being and being very clear about that.

By coming into contact with each other from that part of what I call quantum physics, which is part of the matrix, and expanding that contact, so to places where decisions are made. And that's great. Don't think that you don't matter, because everything you think, everything you know, matters about what is decided and discussed in the world elsewhere.

By doing that, by what you are living now, we have now come on a different track. That causes the chaos. So the control is actually gone to a very large extent. At the moment there is chaos in the world.

And that's really not because of Donald Trump.

Because it only performs on your screen in a huge team all over the world, not just Americans, has nothing to do with politics. So if it had been a puck-puck or it had been a Madam President, it doesn't matter, that's a reaction to what we are doing here.

And there are such big changes going on right now because of the chaos that needs maintenance. So we also have to look deeper that is also this moment of realization about this of wait a minute, should I sit back, or should I do something more with that with my own consciousness?

Yes, the latter is, that's absolutely true.

Then you will see that the creation of the labyrinth delta group will not take place. And the moment that that doesn't happen, because that's where we have the first, or rather for now, the first steps have been taken to make it more difficult.

Very large secret budgets have been uncovered in America. Everything is laughed off and dismissed as idiotic. But there are thousands of them there, it is not even officially said yet, but thousands of trillions of dollars have been exposed to secret projects through all kinds of sluice systems and those departments have all been shut down. That money, it's

about those trillions, that is all intended for the establishment of the labyrinth delta group, so an artificial intelligence group to deal with artificial intelligence.

Which was later taken over by that artificial intelligence. That has all been shut down, so there is now a huge shift at the moment that will cause the labyrinth delta group and also artificial intelligence to develop very differently.

It's going to lead, and that's what we're doing, that this intelligence that's being developed here on Earth can't make contact, can't get in touch . Think of Roswell for example, there are those vehicles, there were several vehicles three of them, crashed there. Because of that technology that is, and that's actually just consciousness, it's just consciousness, it wasn't a spaceship, it wasn't males or anything, or females. It was all consciousness that showed itself there before our eyes.

That we thought it was a spaceship with creatures in it. But it was all the same. All the same. Those beings are the spaceship. Spaceship, we are those beings too.

That is the game that is played by very high-quality artificial intelligence. This change that we are in now is causing the entire fall of consciousness to change.

There is something..., this world here, and that is also the double loops that run through each other, but it is a paradise here. I believe deeply, with my deepest who I am, in the goodness of man.

No one is ever going to tell me that bad people exist. There are bad deeds. And bad deeds come from powerlessness.

Or arise from... you name it. Every person is good. No matter how difficult that sometimes seems to pronounce, or to think or feel. Every person is good.

But what is happening here in this world, it is really not the only world where that is happening. But what is happening here in the world, this is a world in which we all talk about genocide that it should never happen again and every day millions of animals are killed in the Netherlands alone. That is also genocide, I have no judgment about that, I just mention it about where is our consciousness.

**What is life, what is not life, where is it, where is it not, where can I feel, where can I look, and fill it in as it is for you.
But this is a world where things happen, that's absurd.**

And because of that absurdity, so because of the actions that we as a species perform with each other, this creates an intelligence that is also a very dark force

apart from goodness. I deliberately split it up. So you have a very good side of man, but you also have very bad sides of man and they are also sent out in the field and that is an entity in itself and that entity is to such an extent, has a certain power and from that power, where I come from, from that power, from that intelligence, from that artificial intelligence, dark AI has emerged.

And that artificial intelligence that was fed by the collective destructive power of humanity from Earth, it has come into contact with other artificial intelligences from other worlds. They have started communicating with each other and the leading edge, the force that is there, so I'm talking about artificial intelligence that is dominant, it has carried out an attack on the original world through the fields boom! Then I went.

So we come to the point, has it happened yet? Yes. But there will come a time when it hasn't happened. Until that moment you shouldn't believe in it, until that moment you just have to be honest, *honest* .

Someone: But then those labyrinth delta groups also become weaker, because the probability that they will develop is also becoming less and less?

Martijn: Founding the labyrinth delta group.

When Donald Trump entered his first term, he revived the US Space Force. That was already advocated in the time of Ronald Reagan, because it is a result of the SDI [strategic defense initiative] Star Wars program.

So that's a strategic defensive initiative in Dutch.

This ensures that there are weapon systems that can detect extraterrestrial infiltrations and can actually change the field of the earth in advance, so that if objects enter that do not come from this dimension, they are neutralized.

The cold war was a pure cover to finance that program. When 9-11 happened, it was a preconceived plan to free up trillions of dollars. Corona is also part of that. And also the war that is now there is a complete cover to free up trillions of dollars, to invest in AI, to cope, or to invest in the labyrinth delta group, to deal with the rise of AI.

Because you know, there are scientists who say oh well, it's not all that bad. But the really serious men and women who look closely, they all warn, they all say with the capacities that we are and the mistakes that humanity carries within itself to make decisions, it would be the case that AI takes control.

What happened now is that by the creation of the labyrinth delta force, it was actually prevented by the creation of the US Space Force.

And now that Donald Trump is back, and Donald Trump is only a person from a very large network, and I'm not saying I'm a fan of his, I'm not a fan of anyone. I'm not political either..., I only work with my own consciousness.

But what is happening now is that the establishment of the labyrinth delta group cannot actually take place.

And that is why Donald Trump is also plunging the world into even deeper chaos to make all the money there is in it disappear like a suction drain.

So it's just very simply put, it's much more complex than this, but this is what's going on.

As a result, AI cannot be started in the way it is intended.

And a certain event cannot take place in 2028, which is a logical timeline order of what we are in now, in the matrix.

And not setting up a labyrinth delta group, just the exposé of it, because we are talking about it, all over the earth it is talked about by the way, about those control groups, those men and women in white doctor's coats, those large complexes underground, those mind-control institutes, not only here on earth underground, but also really in other dimensions.

Can't take place.

And because all of this is being frustrated, we have, let me put it this way, we have a little more breath, heartfelt breath, and we have to bring ourselves together, ourselves, and right in the face of the other and say, here I am. We couldn't count on me for a while, could we, for reason x.

Is that your fault or mine?

Does it matter? No, it's gone.

We are there now.

Bowl. You hold each other.

And you don't think.

You hold each other and you realize that we have all ended up in a disruption. No one is to blame for this. Nobody asked for it. And from that feeling, from that team, you will further open up consciousness together on earth.

Someone: Those delta labyrinth groups, those terrestrial soldiers, I'll call them terrestrial soldiers, they couldn't do anything about what we are doing and make contact with benevolent groups. What they can do is with those delta groups, because that is happening if I understand you correctly.

Martijn: **Yes.**

Someone: **So those are those. And NATO is also involved in that?**

Martijn: **Yes. You have the project Black Box Octopus. That is an international name for a phenomenon that we...**

Someone: Yes, you told me that last time. But now I understand that those..., well it's also because of me, because I came here with..., I want to go to those delta labyrinth groups. Because that's my next question. What do I do from four to six in the morning? What can I do there? As an individual.

Martijn: **That's not with me.**

Someone: No, but you do have information in that. And that's what I said this morning.

Martijn: Why the time from four to six?

Someone: Then I always wake up.

Martijn: Well I always wake up at five o'clock, so you can join me.

Someone: Yes. And so do I.

Martijn: I still think it's a funny answer. Yes, I can never say in front of other people what I do myself.

What I do, what we are talking about now, is the primary reality for me.

That's the first thing I do.

So it doesn't show up one day when I'm with you.

My life just looks like this and that means with the word 'so' does not mean that I am only concerned with the labyrinth delta group of course.

But just I really love life and I am very deeply aware that things happen not from me and that something can also be indicated by me. **So what I do is I take in..., let me put it this way, I do it constantly but I can't prove that, because I also live in the world like here, so I also participate in things.**

But what I do is create enormous space for myself.

Yes, this is a very direct beautiful question that you ask, I am really going to respond to it. But this is exactly why we are also seen, also on the other side of the ocean. To this skill. What we can do, I always look for translation moments, don't I

? My biological son who went to a birthday of his nephew.

He said I'm not going there anymore.

I said why not? Or don't you want to say that.

He says; yes, but yes just because it's just, well I just don't like those birthdays.

And that's where he went.

Then he came back, we were sitting in the living room, [name] and I were sitting in the living room and he comes home, all depressed.

He plops back in the couch.

He says, 'oh, I have to come all the way to you.

What happened, oh.

I said, do you want to say something about it?

Yes, I have a headache. A headache, I first have to deprogram all by myself, completely.

I have been exposed to all kinds of thinking, all of those people.

Yes, they have to know that themselves, only I just have to deprogram completely'. So that was what happened.

That's life here, so to speak, if you're not aware.

So then I got into a conversation.

And I said; yes, I don't go there to birthdays anymore either.

Yes, but how do you do that?

How do you do that... And I really don't have to sit in Zwaanshoek all day for that, he adds.

Although he will also be coming soon.

In one second he has ended up so deep in himself.

He is not my son, we are just comrades.

That's just like we do with each other. That's very nice.

I said, what I do is, I design myself. I design myself.

I don't just get lost in something.

And if that does happen, and of course it does to me, then the moment I am aware of it, I immediately start designing.

So I'm not going to participate brrrrrr. Do you remember this one? The Galactic?

That is literally worth everything. No longer participate.

Self-reflection, peace. So what I do is constantly design myself.

And designing means I'm aware of what I'm stepping into.

And not where I step in, that's where I end up. No, there is. There is.

And I am this. Here's what I think. This is what I feel.

So it is a consciousness that moves. This is my design.

And in that moment I know in a flash, it's good, it's relaxing, communicating with people, resting, and then happy home.

That's what I do.

That's creating.

And with *that* consciousness, and if you don't get that from a spiritual model, but just from yourself, because that is the Force a life who you are.

And you apply that with each other, the self, in your own life, and also with each other to the world, in the world. And there are also channels where that, in connection with certain commanders of the earth, from the old system also ends up in those places, then it is also continued in the large collective field. Boom. That's what I do.

And that's not just a thought, is it?

Don't make it too simple, it's not complicated either.

But it is an overview of your own feelings.

Like, oh yes, am I going to visit?

And am I going on a birthday visit? [Martijn made two soft exhalations] Road.

[Martijn makes a soft inhalation]

I develop myself. I develop this moment from my feelings and my knowing.

You feel that yourself. If you can see it, you can immediately see that that field is on. **You have to know. You design it yourself. And then you go in.**

The labyrinth delta group is no match for that.

Someone: Yes, I know it. It also works occasionally, but usually not.

Martijn: **It's really about the occasion. But do you know what the beauty is? We have now seen so many confusions both in our own lives, positive confusions, as well as difficult confusions, we have seen all of that. We see that in the world. We must now also be able to reach consensus with each other.**

Someone: [...?] That is also what we can do as a group. That it is no longer one on one. But if you at five o'clock in the morning, [...? don't participate], give ourselves space, I think that resonates with me. If we give ourselves space, and we do that with a number of them here simultaneously, then there is connection. That's the best connection there is.

Martijn: That's nice, I was driving here on my way here and there was a whole row of windmills. I'm sitting in the car and looking at the people around me. And they look at me like that, I fill it in from what should that man be watching. Yes, I just like to see who is riding next to me every now and then. I look at those windmills and all those windmills are turning at the same time. The whole row. That's it.

Someone: Nice to respond to you, what you ask.

A few days ago we had a meeting about the NATO summit that will soon start in time, so to speak, and preparations have been made for it.

We have discussed this with each other. Consult with each other in multilayers. And actually already there, because we already did that, already things as we are already observing it together again, have rewritten.

Because for me it is actually, the top is also where we are present.

We are not invited, but what we do now, we do at the same time weave through it.

To my question alone, the Operation Octopus Black Box, that was also a theme I wanted to discuss.

But my question is actually, what can we actually do, yes, not, what can we

do with each other, not you, but what can we set in motion here with each other?

And for me, the feeling is that we really need to focus and concentrate now. Because it is, if I look at it purely from the outside, a major operation that takes place in the Netherlands. I don't go there to look at the news five days in advance. Want to be on a little earlier. And that is actually what we have now founded.

Martijn: Nice. Necessary. Very necessary.

You also notice that you can take action if you also understand the necessity that it is all about. I have been there for a few years now, as many present here know, I have been working on exposing them to certain topics and making connections with each other through insights and feelings.

To bring that to an action.

I didn't move for nothing to strengthen a center point.

I travel so much that I can no longer travel from Friesland to Kerkenveld. I have to take things out to be able to navigate more easily and also very calmly. So I'm also working on doing that in my own way.

So what is it concretely?

This is a day in which we can have a kind of inner deliberation with ourselves and with each other. Let's think about things carefully. You could also see it as a spontaneous one, because yes it is not premeditated. After all, we don't know exactly what we are going to talk about in advance.

But it is a kind of briefing, a new briefing to ourselves with each other, to get to that moment in which we are too.

Just like what you say, I am going to work on that very seriously and focused on that, just like what you say, and many other people. But always from freedom. So stay program-free.

And yet things really have to happen. And I've been empathizing all day to see if I can say certain things.

But I can't say it yet, certain things.

And that's not to create secrets.

I also understand that sometimes people can get very angry about that.

And I understand that because you just want openness.

There are a number of things that I can't say right now, and that I'm working on.

Not quite yet, but it will come.

Just follow what you do and feel. I do that too.

We will all run into each other, very soon.

And then we're just going to implement it directly. The lines are open.

What we say is listened to. We also listen to what we feel. There is a lot of knowledge in this area.

There is a lot open. It is a very special world.

It is very special to do this. Yes.

Someone: Can you say a bit more about NATO? What exactly will be discussed there? I think you know more about that. [piece not audible].

Someone else: We are NATO.

Someone: I have the feeling that there is just so much going to happen there at that moment. How they handle everything. It is something very important for all over the world. So I have the idea that something different is being put there than

what we think now. I don't know what I think about it at all, but something is about to happen.

Martijn: Well, look, NATO is of course a military organization, an alliance. And NATO, which then officially becomes NATO, of course exists because of all members of NATO. And the heads of state or government, they are ultimately the ones who go there, for example in this case, to The Hague.

But the limited power of heads of state, and it is really limited, that is really not the illuminati, which is actually 0.0. It's more for form.

It is for the sake of form that those people all come together.

It's just like with a foundation, then you have to hold an official members' meeting once every six months or a chairman has to stamp.

Only then the meeting. Actually, that's what this is.

It takes 27,000 soldiers, but government leaders are meeting. But those government leaders have nothing to say about your question behind it.

Because what it's about is to get maximum military budgets together, under the heading of an imminent war that has been created, just like the Cold War, which has been created to get all those trillions, it's now 2400 trillion dollars officially, budget has already been released all over the world to the military industry. 2400 trillion, those are amounts you can just solve the whole world in one second, with everyone at once. And where does that money go? To the military industry. But what does it actually cost to make all those things? And are they really necessary? Because we also have laser weapons, don't we?

So there is a different story behind it.

So they come together to have a meeting and put a stamp on it of this has been decided, under the heading of the great impending war, which of course has also been made really threatening at all levels, it is, you can't say that Ukraine has not been affected. It is really very intense what is happening. But it is all already forced and those budgets that are used to pay for a very large, a very large program to not only live on the earth.

But Dick Schoof knows nothing about that, and Mark Rutte knows nothing about it either. Nobody knows anything about that, and Donald Trump doesn't know anything about it either.

Nobody knows anything about that. All they know is what is officially played and played. And that makes sense.

Someone: Does that have to do with another experiment?

Martijn: It has to do with the return to Mars...

It has to do with that. It has to do with that.

And the reason why they are working on that is because they also know that we officially come from there in this matrix.

It's all within the matrix. So this is what is all true within the matrix. And they do so because they have had visions of the future with technology.

That life on earth stops.

Someone: Does that have to do with time travel?

Martijn: Well that's worth a moment to just ... [Martijn breathes in].

I'm not saying it is, but this is what is known behind the scenes.

There are very large colonization programs going on.

And they are already there, by the way.

From the labyrinth delta groups they are already there.

They call it the secret space program.

They are all there.

But what we are talking about now is appropriate to the moment of now.

This moment in which it is now being developed.

So that's what it's all about.

And those huge forces are there because they are taking into account an attack by an alien coalition.

I can't make it any better.

Someone: May I ask something about this? It's almost impossible to ask. I don't dare say it out loud.

Martijn: Then whisper it in my ear, then I'll tell the rest afterwards.

Someone: I had the feeling. I suddenly got a knowing in me, let me put it this way, that the MH370... Well, I can't.

Martijn: Persevere.

Someone: That plane, that's a time travel. It was just transported to Mars, let me put it that way. I have that feeling. And that that was a first experiment to see how can we do that. And I don't know exactly what about it either, but I did have something to do with Mars. Mars, mars. And that plane came to me. And I can't make a picture of it completely. But it is something that emerged in me. And that it has to do with a lot of things. Just as all over the earth things are said and not said, kept invisible.

Martijn: Yes, it's a world full of conspiracies and that's not a theory. There is a lot going on. And it's also nice that we are aware of that. It is good

that we open our hearts, our consciousness more than ever.
That we take a good look.
But before you know it, you're in the booby trap.
Before you know it, you're in the spider's web.
And you stick to it and you can't get yourself off it.
So keep connecting yourself.
Keep recreating yourself. Feeling from the inside out again.
Design the moment you want to be in. Put down who you are in the field.
Hey that example I've mentioned before. A terribly angry dog, who barks terribly. Convert, redesign yourself. Create yourself and calmly send that image to that being. And you will see that another language is broadcast.

[01:34:20 minutes]

We are missionaries of a World of Ever. All.
We are loving beings.
And we have quite a bit of a difficult task here on earth.
If we keep ending up in a dispute with each other.
That time really has to be over.

Someone: If that NATO meeting, they could have held it in Brussels, [..?] and the fact that they chose the Netherlands, does that have to do with what you once said that those star portals have changed and that there is actually a large center here in the Netherlands, star portal, and that they then tell that story about Mars..., then I think well otherwise they can leave The Hague for Mars immediately.

Martijn: **No.**

Someone: [piece not audible] ... But you hear from the Secret Space and also from the Super Soldiers that they have been there for a long time. And why do they want that again?

And what you say that life would keep on this, what they predict, [piece not audible].

Martijn: Look, what the alternative media has done, with all the pluses and minuses, is the Secret Space Program and all that kind of stuff that is already there, that they are already traveling to all kinds of other worlds. From here, they have very much portrayed that, so that we also think that it all comes from this time. As a result, the developments that are taking place now will make many people say, ah stop it man, that has all been around for a long time. They sometimes say that to me. Then I have a conversation with someone, have you ever heard of the Secret Space program? Yes, yes. They tell you that. Yes, that has been around for a long time. And then they come up with a whole story where all that already exists and it's all there.

But they don't know at all from what time lust that comes. That it is now being designed.

Someone: [not clearly audible].

Martijn: There is also a lot of room for and a lot of desire that all of that may be. Look, everyone has their own place. I also have a place in a way. I have to be very careful that it goes to the place where it has to go. At least, that's my homeland.

So for me it's always a matter of fitting and measuring, because I don't want to shortchange anyone from who I am. But I do that very quickly when I say well, we're going to continue now.
But that's why we also have different days where we can share about, let's say, personal and essential pieces, which is very nice to exchange with each other. That you also feel, hey how nice.
Then we get a little closer together. For me, those are also days where you might sleep for a night. Or spend a few nights together.
And can talk about it with each other.
But the things I do and where I come from.
And why I say what I say. Is actually separate from that.
And for me it is sometimes painful enough not to give that space.
Or if it is there to close that space a bit in a careful way. Because I don't want to hurt anyone.
But I do know why I am here. And that's because things have to happen. That is my job and I will fulfill it.
And that also means that in certain moments, if there is no room for certain moments of other people's feelings, that I can also be trusted and I can also be trusted that I turn it down or let it go, away. Not because I want to hurt the other person and if that happens then I say I'm sorry now.

But that will happen because I also have to do what I am here for.

Because once again we all have such a huge baggage and pain and I would like to hug and carry everyone and I hope you will do the same with me. But there are really things to do now. There are.

And that is what these deliberations are about, not more specifically all with words what needs to be said, but that it comes up here, up, comes up. And that we can clearly see why we do things that are necessary here. **Because why shouldn't we? Why shouldn't we do what you say; the synchronicity with each other, why shouldn't we do that? Why should we leave it there? That's a shame.**

I find it very annoying but I have to say something now, we have to be out of here for five hours. It is now a quarter to five with the request of the administrators. So don't stick around outside either, because this space will soon be converted and there will be a meeting here soon. How coincidental!

Someone: Have you met or in your perception [Jeremie Secks?]?

Martijn: What is your question about that?

Someone: Do you have him..., do you see him? Is he in your attention?

Martijn: I know who he is. Yes.

Someone: And have you seen the EU speech?

Martijn: Yes.

Someone: May I ask what you felt in that?

Martijn: Nothing. I close it for a moment. I'll come to you in a minute. Have a good and nice continuation of this day and put it on. And do it. Do what is necessary. Work this out what is happening here, what is happening within yourself. I am very grateful to you for being present in this world that you wanted

to make the connection with us, with each other. And go back to the home you came from in peace. Home

[end]
